Abstract

Abstract: Do you know “Over 43% of ISI papers have never ever received any citations?” (nature.com/top100, 2014). Publishing a high quality paper in scientific journals is only halfway towards receiving citation in the future. The rest of the journey is dependent on disseminating the publications via proper utilization of the “Research Tools”. Proper tools allow the researchers to increase the research impact and citations for their publications. This workshop will provide various techniques on how you can increase the visibility and hence the impact of your research work.

Keywords: H-index, Improve citations, Research tools, Bibliometrics, Research visibility, Research impact

UNIVERSITY LIBRARIES

UNIVERSITY AT ALBANY - STATE UNIVERSITY OF NEW YORK

Effective Strategies for Increasing Citation Frequency

Journal Reputation and Impact: publishing a paper in a journal based on disciplinary reputatation or with a high impact factor is the most well known way of getting your paper cited. But there are many other things a scholar can do to promote his or her work and make it easy for others to find.

Utilize Open Access Tools: Open Access journals tend to be cited more than non open access. Deposit your paper in a repository such as Scholars Archive here on campus or a disciplinary repository. Share your detailed research data in a repository.

Standarize Identifying Info: try to use the same name throughout your career as well as the name of your affiliated insitution. Using common "official" names will allow for consistency and easy retrieval of your work by author or affiliation.

Bring Colleagues on Board: team-authored articles are cited more frequently, as does publishing with international authors. Working cross-or inter-disciplinarily helps as well.

Beef Up That Paper: use more references, publish a longer paper. Also papers which are published elsewhere after having been rejected are cited more frequently.

Beyond Peer-Reviewed Original Research: Write a review paper. Present a working paper. Write and disseminate web-based tutorials on your topic.

Search Optimization: use keywords in the abstract and assign them to the manuscript. Use descriptive titles that utilize the obvious terms searchers would use to look for your topic, avoiding questions in the title. Select a journal that is indexed in the key library databases for your field.

Market Yourself: create a key phrase that describes your research career and use it. Update your professional web page and publication lists frequently. Link to your latest and greatest article in your professional email signature file.

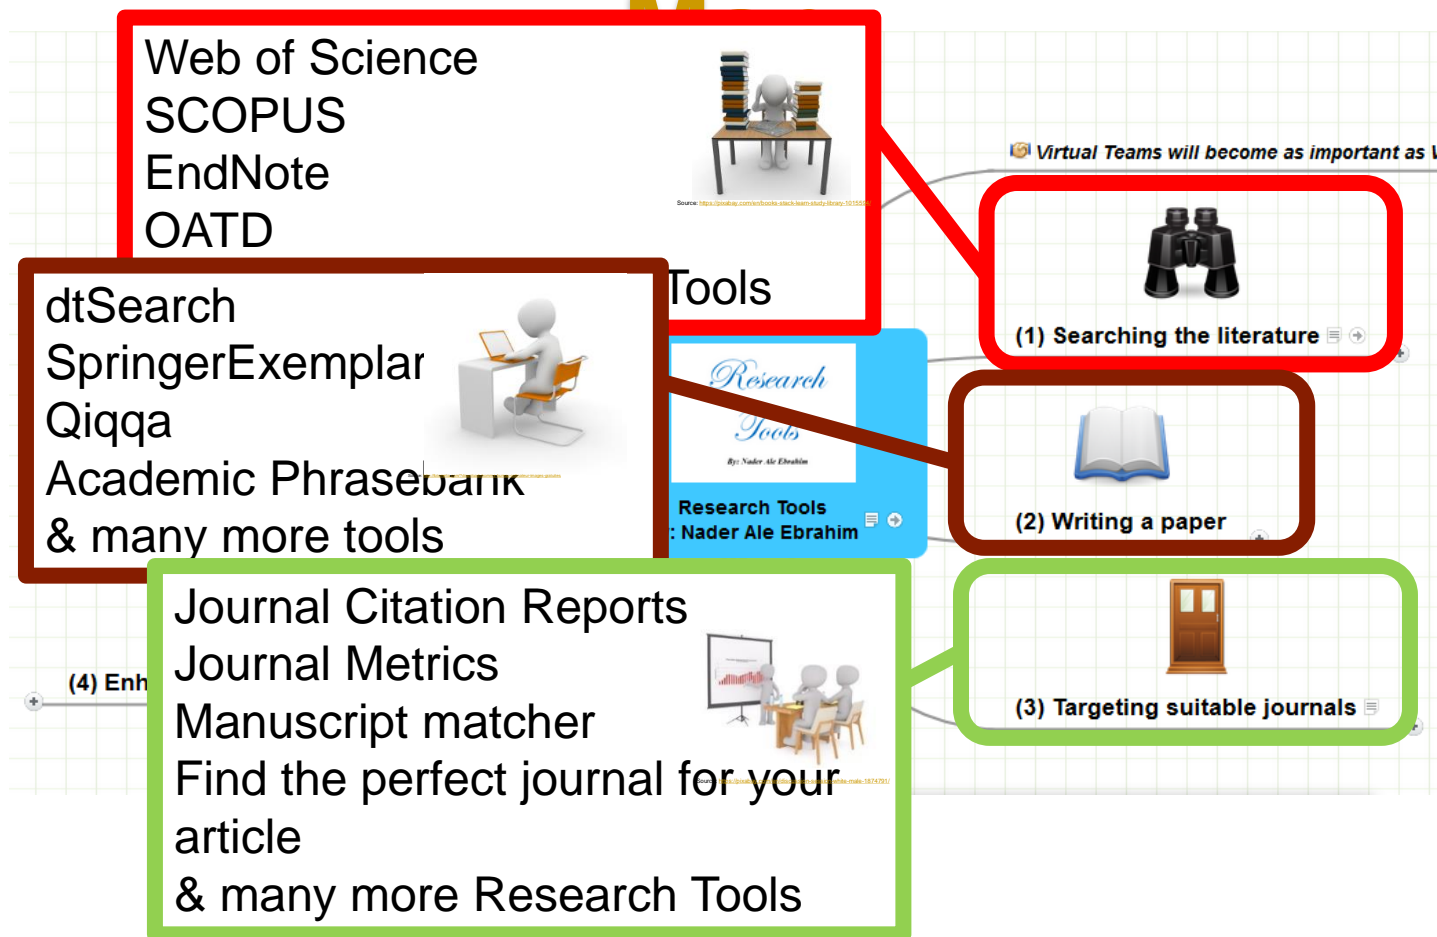

Utlizie Social Media: Use author profiles such as ResearcherID and ORCID. Contribute to Wikipedia, start a blog and/or podcast, join academic social media sites.

Times Higher Education World University Ranking system

The *Times Higher Education World University Rankings* 2012-2013 are the only global university performance tables to judge research-led universities across all their core missions - teaching, research, knowledge transfer and international outlook.

We employ 13 carefully calibrated performance indicators to provide the most comprehensive and balanced comparisons, which are trusted by students, academics, university leaders, industry and governments.

The methodology for the 2012-2013 World University Rankings is identical to that used for the 2011-2012 tables, offering a year-on-year comparison based on true performance rather than methodological change.

Our 13 performance indicators are grouped into five areas:

Teaching: the learning environment (worth 30 per cent of the overall ranking score)

Research: volume, income and reputation (worth 30 per cent)

Citations: research influence (worth 30 per cent)

Industry income: innovation (worth 2.5 per cent)

International outlook: staff, students and research (worth 7.5 per cent).

HOW TO MAXIMISE THE VISIBILITY AND IMPACT OF YOUR RESEARCH: PATHWAYS TO OPEN ACCESS

This workshop is aimed at all researchers who have started writing for publication or are considering writing for publication.

A great amount of researchers' time and effort involves writing up their research for publication. However, once a paper is accepted for publication, it is not guaranteed that it will reach the widest possible audience, even if the journal does have a high impact factor.

Next available session: 25th September 2013, 10:00-13:00

Enhancing the Visibility and Impact of Your Research

This workshop will cover various strategies for participants to consider as they undertake research activities.

The strategies are divided into three categories:

1. Preparing for Publication
2. Dissemination
3. Tracking Your Research

After attending this workshop, participants will be able to better understand tools and approaches that can be used to enhance author profiles, promote discoverability and access of research findings, and document evidence of research impact.

Upcoming Sessions

- Wed, March 26, 2014 - 12:00 PM - [Register Now](#)

Visibility and Research Impact

Bibliometrics, Scholarly Communication and Publication Strategies

What is my research impact and how can I influence my h-index? How can I use academic identity management and social media for improving my presence on the internet? The course gives an overview of different issues with scholarly publication and improvement of research impact.

Topics

The first part of the course covers these topics

- academic identity management
- impact factor, h-index and citation analysis

For the second part, we offer a range of topics to choose from

- academic networking and your presence on the internet
- current awareness - how to keep up-to-date in your research area
- publication strategies - how to find the right journal for publishing
- altmetrics - alternative bibliometric methods
- search engine optimization for your publications

Course Details

Open to: TUM Doctoral Candidates, TUM Scientists

Contact:

With questions on our course program please contact us at workshop@ub.tum.de.

Upcoming dates

- Monday, 16. January 2017 - 9:00 to 13:00
Munich: Seminar Room S2534 (TUM Barer Street 21)
 Course language: German
 Open

HOW TO INCREASE VISIBILITY AND IMPACT OF YOUR RESEARCH

**PROGRAMME IS FOR**

PhD students from the UT who will submit an article to a scientific journal in the upcoming months. This will be used as your starting point in the exercises.

**ECTS**

The total time investment amounts to 0,5 ECTS.

**DATE**

Thursday 13 December 2018 and Friday 18 January 2019 (2 x 4 hours) and self-study exercises in between (approx. 6 hours)

**TIME**

Participants are required to attend both course days in full.
Self-study time: approximately 6 hours.

**LOCATION**

University library

**COURSE FEE**

Course participation is free of charge for UT staff

**TRAINERS**

Hanneke Becht and Nicole Loorbach

Introducing our Digital Identity Healthcheck for Academics

Source: <https://blog.piirus.ac.uk/2015/10/19/digital-identity-healthcheck-for-academics-our-video-summary/>

From submission to sharing: the life cycle of an article

- **Phase 1: Conception and birth**
- **Phase 2: Submission**
- **Phase 3: Reviewers**
- **Phase 4: Production and publication**
- **Phase 5: Dissemination and archiving**
 - The article is published, but its life cycle isn't yet complete. In this phase, dissemination can start; sharing the Share Links article helps increase readership and make it more visible.

Citation manipulation: Journal retracts paper because author boosted references to a journal he edits

with 5 comments

A group of researchers have lost a paper in a computer science journal because they were apparently using its references to help the impact factor of a different journal that one of them edits.

Here's the [notice](#) for "Impacts of sensor node distributions on coverage in sensor networks," a paper first published in 2011 and cited four times, according to Thomson Scientific's Web of Knowledge: [Read the rest of this entry »](#)

Preparing for Publication – Writing

- Use a unique name consistently throughout academic careers;
- Use a standardized institutional affiliation and address;
- Repeat key phrases in the abstract while writing naturally;
- Assign keyword terms to the manuscript;
- Use more references;
- Write a longer paper;
- Write a review paper;
- Present a working paper;

Read more: Ale Ebrahim, N., Salehi, H., Embi, M. A., Habibi Tanha, F., Gholizadeh, H., Motahar, S. M., & Ordi, A. (2013). [Effective Strategies for Increasing Citation Frequency](https://doi.org/10.5539/ies.v6n11p93). International Education Studies, 6(11), 93-99. doi: 10.5539/ies.v6n11p93

A blue feather with a white base lies on a surface of small, light-colored gravel. The feather is positioned vertically on the left side of the frame. A white rounded rectangle with a red border is centered on the right side, containing the text.

**Make sure you have a
SEO-friendly
manuscript, then
submit.**

Make sure your paper doesn't get lost in the crowd. Get your paper Optimized for Search Engines.

When writing a paper title, think about the visibility and consider the search terms people may use to locate information about your topic and include these words.

When submitting an article for publication, authors should consider how easily discoverable their research will be to their audience and enhance opportunities for citation.

Well-Optimized Abstract:

False Remembering in the **Aged**

Researchers studying human **memory** have increasingly focused on **memory** accuracy in **aging** populations. In this article we briefly review the literature on **memory** accuracy in healthy older adults. The prevailing evidence indicates that, compared to younger adults, older adults exhibit both diminished **memory** accuracy and greater susceptibility to misinformation. In addition, older adults demonstrate high levels of confidence in their **false memories**. We suggest an explanatory framework for the high level of **false memories** observed in older adults, a framework based on the theory that consciously controlled uses of **memory** decline with **age**, making older adults more susceptible to **false memories** that rely on automatic processes. We also point to future research that may remedy such deficits in accuracy.

This article appears on the first page of results in Google for false+memory+aged.

Source: <http://authorservices.wiley.com/bauthor/seo.asp>

Poorly Optimized Abstract:

False *Remembering in the Senior Population*

Researchers studying human **memory** have increasingly focused on its accuracy in senior populations. In this article we briefly review the literature on such accuracy in healthy older adults. The prevailing evidence indicates that, compared to younger adults, older adults exhibit both diminished accuracy and greater susceptibility to misinformation. In addition, older adults demonstrate high levels of confidence in their **false memories**. We suggest an explanatory framework for the high levels observed in older adults, a framework based on the theory that consciously controlled uses of **memory** decline in later life, making older adults more susceptible to **false memories** that rely on automatic processes. We also point to future research that may remedy such deficits in accuracy.

Title includes and leads with important keywords

Ocean Acidification and Its Potential Effects on Marine Ecosystems

Keywords

ocean acidification, climate change; carbonate saturation state; seawater chemistry; marine ecosystems; anthropogenic CO₂ *Search term-style keywords provided*

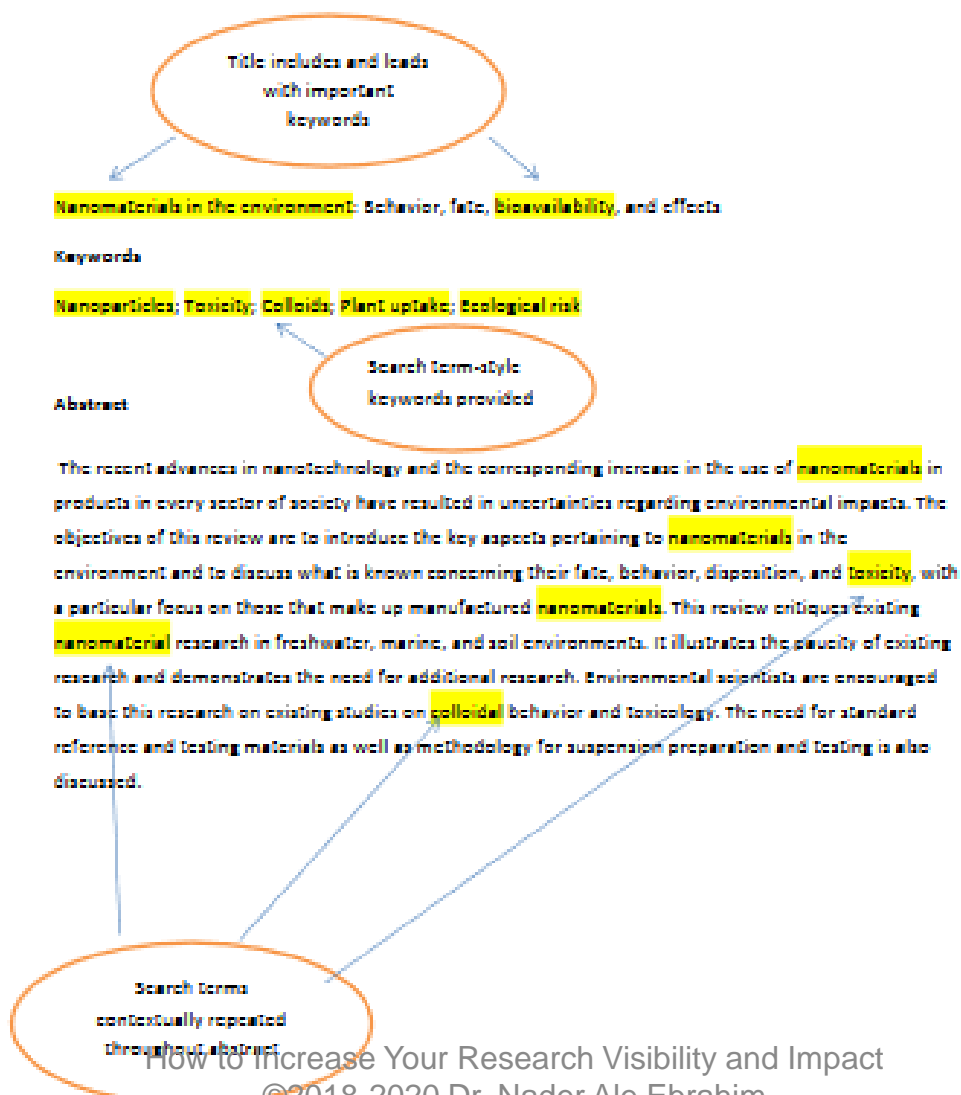

Abstract

Ocean acidification is rapidly changing the carbonate system of the world oceans. Past mass extinction events have been linked to ocean acidification, and the current rate of change in seawater chemistry is unprecedented. Evidence suggests that these changes will have significant consequences for marine taxa, particularly those that build skeletons, shells, and tests of biogenic calcium carbonate. Potential changes in species distributions and abundances could propagate through multiple trophic levels of marine food webs, though research into the long-term ecosystem impacts of ocean acidification is in its infancy. This review attempts to provide a general synthesis of known and/or hypothesized biological and ecosystem responses to increasing ocean acidification. Marine taxa covered in this review include tropical reef-building corals, cold-water corals, crustose coralline algae, *Halimeda*, benthic mollusks, echinoderms, coccolithophores, foraminifera, pteropods, seagrasses, jellyfishes, and fishes. The risk of irreversible ecosystem changes due to ocean acidification should enlighten the ongoing CO₂ emissions debate and make it clear that the human dependence on fossil fuels must end quickly. Political will and significant large-scale investment in clean-energy technologies are essential if we are to avoid the most damaging effects of human-induced climate change, including ocean acidification.

Search terms contextually repeated throughout abstract

Example of Well-Optimized Abstract

Top Downloaded Article from Environmental Toxicology and Chemistry

- **Write a good and short title for your article.** If you can use one or more keywords in the title while accurately describing the content of your article, then do it. Keep in mind the audience of your article and any academic keywords specific to your field to inform which keywords may be best to use.
- **In addition to the keywords tool from Google, check out Google Insights and Google Trends.** With the latter two, you can see the popularity of keywords over a period of time and by geographic location, which may or may not be relevant for you and to your article. Until now, Google offers the most tools for SEO.
- **Don't go overboard with using numerous top keywords in every location of your article.** You want to tastefully optimize your article without compromising the relevance and quality of your writing and research.
- **Using the most popular keyword tool may not always be best for you and your article.** After all, it is the most popular for a reason, partly because it is frequently used in documents by others. You can test this by doing your own search of the keyword and seeing how many search results are found. If it is an exorbitant amount of articles, you may want to choose another keyword that is also very relevant to your research topic.

Where should I submit my publication?

If you want your article to ...

- Publish in most influential or highly cited journal
 - Use Impact Factor or
 - 5 Year Impact Factor (for subjects need longer citation period, e.g. GEOLOGY or MANAGEMENT or SOCIOLOGY, etc)
- To reach out to readers and be read immediately
 - Use Immediacy Index
- Stay active in journal collection
 - Use Cited Half Life

Note: The above only serves as general guidelines, deeper understanding of JCR, the subjects and dynamic publication cycles are crucial when deciding where to publish your paper.

Dissemination 1/2

- Self-archive articles
- Keep your professional web pages and published lists up to date
- Make your research easy to find, especially for online searchers
- Deposit paper in Open Access repository
- Contribute to Wikipedia
- Start blogging

Virtual team

From Wikipedia, the free encyclopedia

A **virtual team** (also known as a **geographically dispersed team**, **distributed team**, or **remote team**^[1]) usually refers to a group of individuals who work together from different geographic locations and rely on [communication technology](#)^[2] such as email, FAX, and video or voice conferencing services in order to collaborate. The term can also refer to groups or teams that work together asynchronously or across organizational levels. Powell, Piccoli and Ives (2004) define virtual teams as "groups of geographically, organizationally and/or time dispersed workers brought together by information and telecommunication technologies to accomplish one or more organizational tasks."^[3] According to Ale Ebrahim et. al. (2009), virtual teams can also be defined as "small temporary groups of geographically, organizationally and/or time dispersed [knowledge workers](#) who coordinate their work predominantly with electronic information and communication technologies in order to accomplish one or more organization tasks."^[4]

Members of virtual teams [communicate electronically](#) and may never meet [face-to-face](#). Virtual teams are made possible by a proliferation of [fiber optic technology](#) that has significantly increased the scope of off-site [communication](#).^[5] Virtual teams allow companies to procure the best talent without geographical restrictions.^[5] According to Hambley, O'Neil, &

JohnRTurner_HPT_resource

This blog is intended to share information, discuss new research, and identify new trends within the Human Performance Technology (HPT) field. HPT is a multi-disciplinary practice that is influenced by a number of cognate disciplines: psychology, systems theory, education, economics, and sociology - to name only a few.

New Article Acceptance: Multiagent Systems as a Team Member

I have received notice that my article titled *Multiagent Systems as a Team Member* will be published by Common Ground Publishing in their journal: *The International Journal of Technology, Knowledge, and Society*. The web page for the journal follows: <http://ijt.cgpublisher.com>

No date as to when the article will be published but it should be this fall. Listed below is the abstract for the journal article to give those interested an indication of what the article is about.

Abstract

With the increasing complex business environment that organizations have to operate in today, teams are being utilized to complete complex tasks. Teams

About Me

 John R. Turner

John R. Turner is a Doctoral Candidate at the University of North Texas in the applied technology and performance improvement (ATPI) program. He started his career in mechanical engineering where he was employed for 15 years. After leaving the engineering service industry, he completed a second bachelor's degree in psychology from the University of Arkansas at Little Rock, followed by a master's degree in human resource development from the University of Texas at Tyler. His research interests are in teams, team cognition, knowledge management, performance improvement, theory building, multilevel models, meta-analysis

Why should you share links to your published work online?

According to Dr Melissa Terras from the University College London Centre for Digital Humanities, “If you tell people about your research, they look at it. Your research will get looked at more than papers which are not promoted via social media” (2012).

- Digital Curiosities: Resource Creation Via Amateur Digitisation
- Enabled backchannel: conference Twitter use by digital humanists
- Framework for effective public digital records management in Uganda
- Library and information resources and users of digital resources in the huma
- A Virtual Tomb for Kelvingrove: Virtual Reality, Archaeology and Education
- What do faculty and students really think about e-books? ← Not me
- Documentation and the users of digital resources in the humanities
- Classification in British public libraries: a historical perspective ← Not me
- Teaching TEI: The Need for TEI by Example
- Should we just send a copy? Digitisation, Use and Usefulness

Dissemination 2/2

- Join academic social networking sites
- link your latest published article to your email signature
- Create a podcast describing the research project and submit the podcast to YouTube or Vimeo
- Make an online CV.

Things to do when a paper comes out: a checklist

- Write a [blog-post](#) on SV-POW!
- Create a [new page](#) about paper in the SV-POW! sidebar.
- Add the [full-resolution figures](#) to the sidebar page.
- Update my [online publications list](#).
- Update my [University of Bristol IR page](#).
- Update my [ORCID page](#).
- Update my [LinkedIn page](#).
- Mendeley, if you do it (I don't).
- ResearchGate, if you do it (I don't).
- Academia.edu, if you do it (I don't).
- Keep an eye on [the new taxon's Wikipedia page](#) (once it exists).
- Add the paper to [the Paleobiology Database](#) (or ask someone to do it for you if you're not authorised). [Credit: Jon Tennant]
- Tweet about it! [Credit: [Matt Hodgkinson](#)]
- Update Google Scholar, if it doesn't pick up on the publication on its own [Credit: Christopher Taylor]
- Post on Facebook [Credit: Andy Farke]
- Send PDF to the institution that hosts the material [Credit: Andy Farke]
- Email colleagues who might be interested [Credit: Andy Farke]
- Write short popular language account for your institution if applicable [Credit: Andy Farke]
- Submit any silhouettes to [PhyloPic](#) [Credit: Mike Keesey]
