Manuscript Title: Encapsulation of Bone Marrow-MSCs in PRP-Derived Fibrin Microbeads and Preliminary Evaluation in a Volumetric Muscle Loss Injury Rat Model: Modular Muscle Tissue Engineering

Number of Pages: 2 **Number of Figures:** 2

Figure S1. Representative anti-Myogenin-stained sections of the muscle explants retrieved from subjects with VML injury at 30, 60 and 180 days post-transplantation. Scale bars: 300 µm.

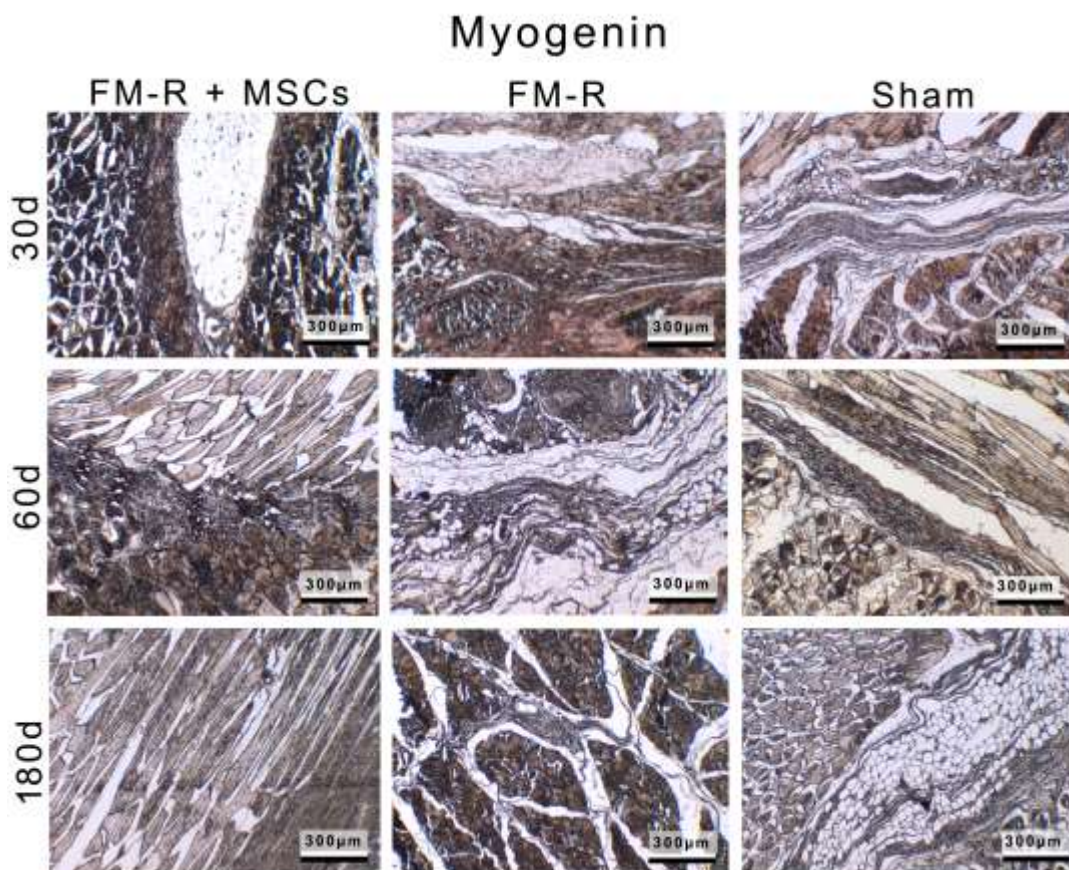

Figure S2. Representative anti-MyoD1-stained sections of the muscle explants retrieved from subjects with VML injury at 30, 60 and 180 days post-transplantation. Scale bars: 300 μ m.
