# **BUT NONE OF THIS MATTERS UNLESS YOU ASK YOURSELF . . .**

What is it you want? What are your goals? Do you have a preservation plan?

What expertise do you need? What expertise do you have or lack?

Would you rather spend money on organizational staffing or outsource?

# BUT NONE OF THIS MATTERS UNLESS. . .

Cloud or local storage?

Do you want to support/be part of open source or academic-led products, or spend commercially?

*Or both — some organizations straddle the line*
