Content

ELIXIR & ELIXIR Training Platform

- Intro
- Highlights: Train the trainer programme, TeSS

Data Stewardship

- Competencies and skills
- Curriculum building
- Community building: Data Steward Interest Group
- Training, a few examples
- Tool: ELIXIR Data Stewardship Wizard (DSW)
- Standards: FAIR Training Working Group

Quick intro Celia

- Disclaimer:
 - I am not an expert in RDM and I am not a Data Steward
 - You are the experts in that area!
- My expertise is in Training:
 - Programme Manager DTL Learning/ELIXIR-NL Training
 - Co-lead ELIXIR Europe Training Platform
 - Member of Executive Board of GOBLET
 - My background: PhD in Biochemistry/Bioinformatics, Bioinformatics teacher, Training Manager, Coordinator, Organizer for many years
- I will share with you the ELIXIR projects that relate to data stewardship & training
 - You may notice some emphasis on the work of my own Node, ELIXIR-NL

ELIXIR: European infrastructure for biological information

Data infrastructure for Europe's life-science research:

22 Members and 1 Observers
~ 180 institutes involved

Data

Interoperability

Tools

Compute

Training

Marine metagenomics

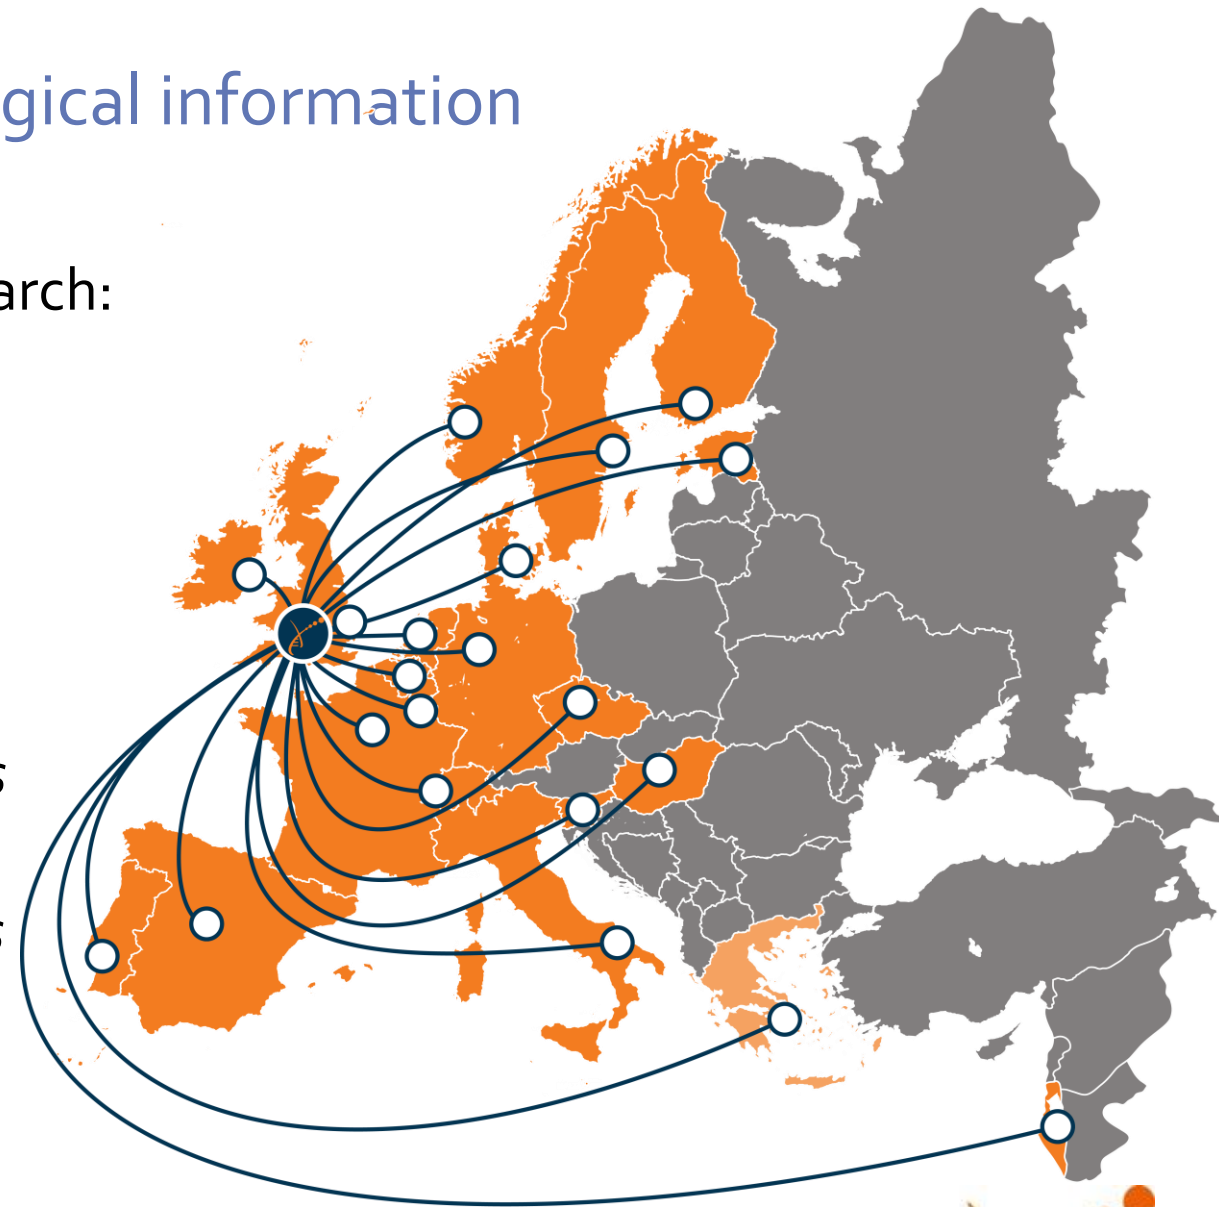

Crop and forest plants

Human data

Rare diseases

www.elixir-europe.org

[@ELIXIREurope](https://twitter.com/ELIXIREurope)

ELIXIR Training Platform

- **Build a sustainable training infrastructure** - supported and adopted by all member states
- **Deliver a coherent, high-quality and impactful ELIXIR training program**
 - addressing training gaps
 - growing bioinformatics capacity and competence in Europe
 - empowering researchers across Europe to use the ELIXIR services and tools
- **Builds on and complements trainings in ELIXIR Nodes**

ELIXIR Training - in summary

- **Training events** – researchers, developers, infrastructure operators & trainers
- **Train-the-Trainer** - programme & developed framework
- **TeSS** portal - share & exchange training content and events <https://tess.elixir-europe.org>
- **Training Toolkit** - Training best practices, guidelines, standardized metrics for quality & impact assessment
- Solutions to ease training and communication - **E-learning platform & VCR**

19 Nodes involved:

BE, CH, CZ, DE, EBI, EE, ES, FI, FR, GR, IL, IT, LU, NL, NO, PT, SE, SI, UK

ELIXIR Training: Quality and Impact

<https://www.elixir-europe.org/platforms/training>

eXcelerate

*Sept 2015 - May 2018

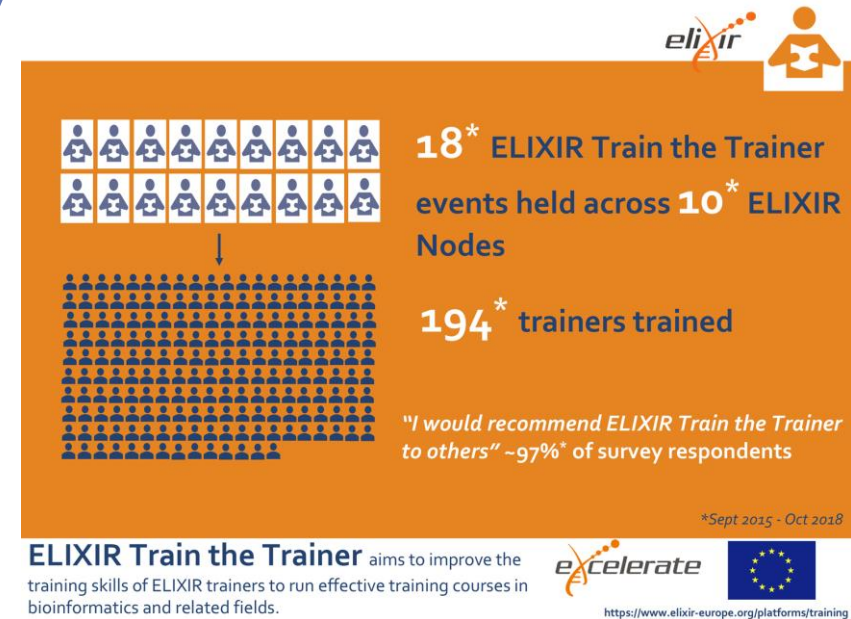

Sept 2015 – May 2018

Train-the-Trainer (TtT) - Building a highly-skilled and coherent community of trainers

- Created an ELIXIR TtT programme with a set of materials and course layouts
- Created a TtT Exchange program – support trainers and Nodes

Sept 2015 – May 2018

F1000Research
Open for Science

OPINION ARTICLE

The ELIXIR-EXCELERATE Train-the-Trainer pilot programme: empower researchers to deliver high-quality training [version 1; referees: awaiting peer review]

✉ Sarah L Morgan¹, Patricia M Palagi ^{2*}, Pedro L Fernandes^{3*}, Eija Koperlainen⁴, Jure Dimec⁵, Diana Marek², Lee Larcombe⁶, Gabriella Rustici⁷, Teresa K Attwood⁸, ✉ Allegra Via ⁹

Briefings in
Bioinformatics

A new pan-European Train-the-Trainer programme for bioinformatics: pilot results on feasibility, utility and sustainability of learning 

Allegra Via ✉, Teresa K. Attwood, Pedro L. Fernandes, Sarah L. Morgan, Maria Victoria Schneider, Patricia M. Palagi, Gabriella Rustici, Rochelle E. Tractenberg ✉

ELIXIR TtT Course setup

The ELIXIR TtT courses are organized around four sessions:

- Learning principles and how they apply to training
- Training techniques that can be used to enhance learner engagement and participation
- Assessment and feedback in training
- Session, course, and materials design

The Learning Objectives are:

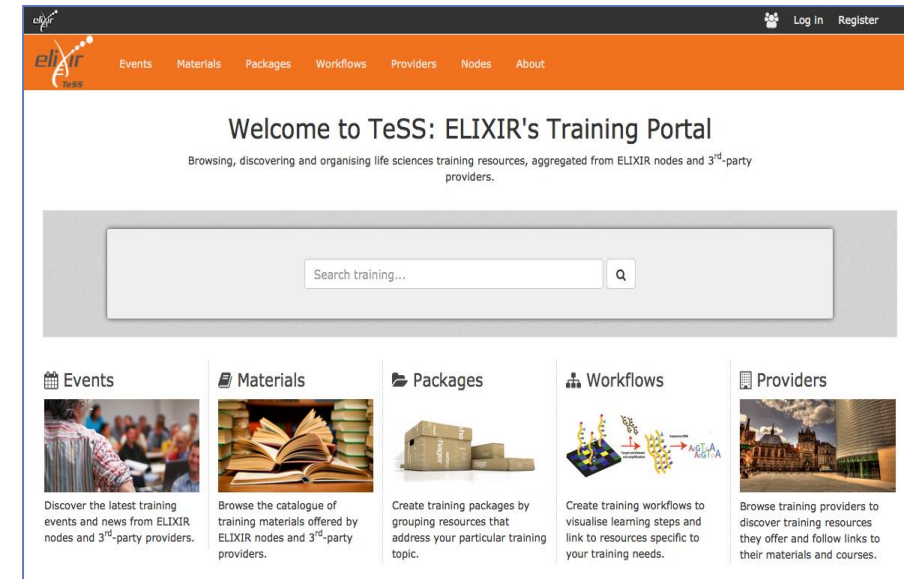

- To get acquainted with learning principles and how they apply to training
 - To be able to select and use training techniques that can enhance learner engagement and participation
 - To learn how to use assessment and feedback in training
 - To learn how to design a session, a course, and course materials
-
- <https://github.com/TrainTheTrainer/EXCELERATE-TtT>
 - Contact: allegria.via@uniroma1.it & patricia.palagi@sib.swiss

ELIXIR Training Portal TeSS

TeSS is an aggregator

- 1242 training materials & 286 upcoming events
- 48 content providers (not only ELIXIR Nodes!)
- majority scraped automatically
- AAI and  Bioschemas integration
- Linked to other ELIXIR registries: bio.tools and 
- Events annotated with EDAM, working on annotating with competencies to create “learning paths”
- TeSS License: BSD-3 for the Code and CC-BY 4.0 for the data
- Contact niall.beard@manchester.ac.uk for more information

<https://tess.elixir-europe.org>

Data Stewardship related activities in ELIXIR

- Competencies and skills
- Curriculum building
- Community building: Data Steward Interest Group
- Training, a few examples
- Tool: ELIXIR Data Stewardship Wizard (DSW)
- Standards: FAIR Training Working Group

- Most activities are across projects and across the ELIXIR Nodes
- Several activities connect to domains outside Life Sciences

Data Stewardship (DS)

- **Data Stewardship**

Responsible planning and executing of all actions on digital data before, during and after a research project, with the aim of optimizing the usability, reusability and reproducibility of the resulting data

- **Capacity building in data stewardship is needed**

- Skills in data management & data stewardship are crucial to deal properly with the data
- Furthermore DMPs are obligatory for many if not all funding applications
- DS has many many many aspects (nobody can do nor has to do all steps of DS)

Training in Data Stewardship – to whom (& what to teach precisely?)

- **Researchers:** create, manage, analyse and share FAIR data
- **Data Stewards:** provide support for research teams, data repositories, data services
- **Reviewers and funders:** assess DMPs, assess FAIRness of datasets, data resources in publications, grant proposals and reports
- **Trainers:** teach how to apply FAIR principles and how to perform good Data Stewardship

Competencies and skills:

Towards FAIR Data Steward as profession for the Life Sciences

- A collaborative approach built on existing expertise
- Aim: professionalise the data steward function within the life-sciences domain, with endorsement of all stakeholders in NL
- <https://zenodo.org/communities/nl-ds-pd-ls/>
- Contact: Salome Scholtens (UMCG), Celia van Gelder (DTL)

First deliverable – Life sciences data steward function matrix

- February 2019, DOI: [10.5281/zenodo.2561723](https://doi.org/10.5281/zenodo.2561723)
- Created by
 - a) analyzing ca 45 job advertisements and
 - b) analyzing and mapping to existing data stewardship competency frameworks (EOSCpilot, Purdue, DAMA, EDISON)
- For 2 types of data stewards:
 - Data Steward A is an institutional/department focused and coordinating, policy-oriented function
 - Data steward B is project focused and an operational, supporting-oriented function

Life sciences data steward function matrix

Nine different function areas were defined for both data steward A & B:

- 1. policy/strategy,
- 2. compliance,
- 3. alignment with FAIR data principles,
- 4. services,
- 5. infrastructure,
- 6. knowledge,
- 7. network,
- 8. data archiving
- 9. supervision.

Data steward Level A - Institutional, coordinating, policy						
	Responsibilities	Activities / tasks	Mappings (see below for reference)			
			Research data life cycle	FAIR data	Purpose compliance	Knowledge
1) Policy / strategy	Responsible for advice on and development, implementation and monitoring of a research data management (RDM) policy and strategy for the research institute, which includes the complete research data life cycle, and supports FAIR data and Open Science, in alignment with the relevant stakeholders and within financial and legal constraints, within the institute and in the context of the institute. The policy is the basis for (project) data management plans (DMP).	<ul style="list-style-type: none">Develops, implements and monitors the institute's RDM policy.Advises the institute's management on short- and long-term actions to advance RDM in the institute.Assesses and monitors institute's time and financial investments in relation to the institute's needs for RDM.Explores new needs, opportunities and trends in RDM.	① ② ③ ④ ⑤ ⑥	F A I R	③ ④ ⑧ *	① ⑤ ⑪ *
2) Compliance	Responsible for compliance of the RDM policy to the Netherlands Code of Conduct for Academic Practice and the General Data Protection Regulation (GDPR), as well as continuous alignment with legal and ethical standards.	<ul style="list-style-type: none">Ensures compatibility of the RDM policy and monitors compliance.Contacts the institute's privacy officer, legal advisors or ethical board in case of questions regarding compliance.Translates policies from legal/privacy officer to the institutes practice.Develops and/or guides standard solutions for recurring data issues and for data classification, including input for the DPIA.	① ② ③ ④ ⑤ ⑥	F A I R	③ ④ ⑧ ⑫ *	① ⑤ ⑪ *
3) Alignment with FAIR data principles	Responsible for compliance to FAIR data.	<ul style="list-style-type: none">Ensures compatibility of the RDM policy and monitors compliance to the FAIR principlesPursues and advises on the findability (F) of data, including adequate infrastructures, persistent identifiers and rich (institute-specific) metadata standards.	① ② ③ ④	F A I R	③ ④ ⑧ *	① ⑤ ⑪ *

- Matrix well received, both nationally and internationally. It is a living document ! At the moment we are incorporating all feedback from the community

Ongoing Work

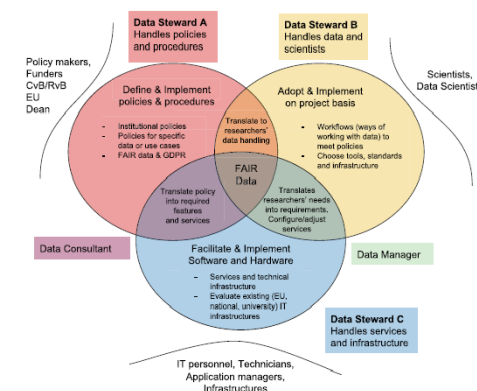

- Definition of the knowledge base, skills and learning objectives ,
DOI: <https://doi.org/10.5281/zenodo.2616477>
- Next steps:
 - Education line, training material, pilot run, script for an eLearning module, sustainability plan to ensure national embedding
- **Save the date:**
two 1-day Workshops 11 & 12 June 2019, Utrecht

Table 2: Example of learning objectives following Bloom's Taxonomy

RESPONSIBILITY:
Compliance
KNOWLEDGE:
Knowledge about legislation, ethics, code of conducts and research codes with regard to (research)data, (medical) research and privacy
SKILL/ABILITY:
Translate legislation and codes of conducts with regard to research data to practical implications and guidelines that researchers can understand
LEARNING OBJECTIVES:
-Explain the legislation and codes of conduct with regard to research data to researchers (applying)
-Examine and list the practical implications of legislation and codes of conduct with regard to research data (analyzing)
-Create guidelines based on legislations and codes of conduct with regard to research data (creating)

Figure 1: Venn diagram of different data steward types

Figure acknowledgement: Christine Stalger, DTL

Community Building – The Data Stewards Interest Group

- June 2017 initial meeting of the Interest Group
- Leiden UMC, DTL, and UMC Utrecht founding members; mailing list has 90 members (NL, BE, LU, UK, SE, FR, DE)
- 9x meetings up until now;
next meeting June 14, 2019 (remote attendance possible)
- Chair: Jasmin Böhmer, UMCU
- <https://www.dtls.nl/community/interest-groups/data-stewards-interest-group/>

Slide: Jasmin K. Böhmer

Mission & Activities of the Data Stewards Interest Group

Providing

... platform for
practical experience
exchange

Fostering

...the national
implementation of
Data Stewards(hip)

Joining

... efforts to produce
hands-on solutions

The Input... experience, guidance, agreements, anecdotes, definitions

The Output ... use cases, documentation, case studies

So far:

- Collection of 24 stories and anecdotes for the promotion of good data stewardship
- Collaborative Paper on FAIR readiness for organizations
- Started inventory of training materials and courses

Curriculum building & lesson development

- **Fair data stewardship curriculum :**

- Lessons developed around the FAIRification process
- Lesson objectives directly connected to the FAIR metrics
- Modelled after the Carpentries,
- will be linked to/from relevant parts of Data Stewardship Wizard

- **4OSS - Four simple recommendations to encourage best practices in research software**

- <https://f1000research.com/articles/6-876/v1>; <https://github.com/SoftDev4Research/working-group>
- Develop **open and reusable training materials** to teach researchers and developers how to adopt the 4OSS as development practices. First lesson release: doi.org/10.5281/zenodo.2565040
- **Upcoming trainings: May 15, Ghent, Belgium and July 15-17, Athens, Greece**

- Contact: Mateusz.Kuzak@dtls.nl

Researchers are afraid of putting their code out there.

- What if I write crap code that nobody likes?
- Will people judge me for the code I write?
- What if someone finds a bug in my code?
- What if I get scooped?
- What are the challenges of Open Software Development?
- What if someone wants to contribute to my code?

- 1**  **OPEN SOURCE YOUR CODE FROM DAY ONE**
Make your source code publicly accessible in a version-controlled repository (e.g. github.com and bitbucket.org) and increase reproducibility, reusability and collaboration.
- 2**  **MAKE YOUR SOFTWARE DISCOVERABLE**
Register your software metadata in a popular community registry (e.g. bio.tools) and increase your project's visibility.
- 3**  **MIND THE LICENSE**
Adopt a license that specifies how others can use and distribute your software. Ensure that the software fits with the license of third-party dependencies.
- 4**  **DEFINE RESPONSIBILITIES**
Let people know how they can contribute to your project and contact you.

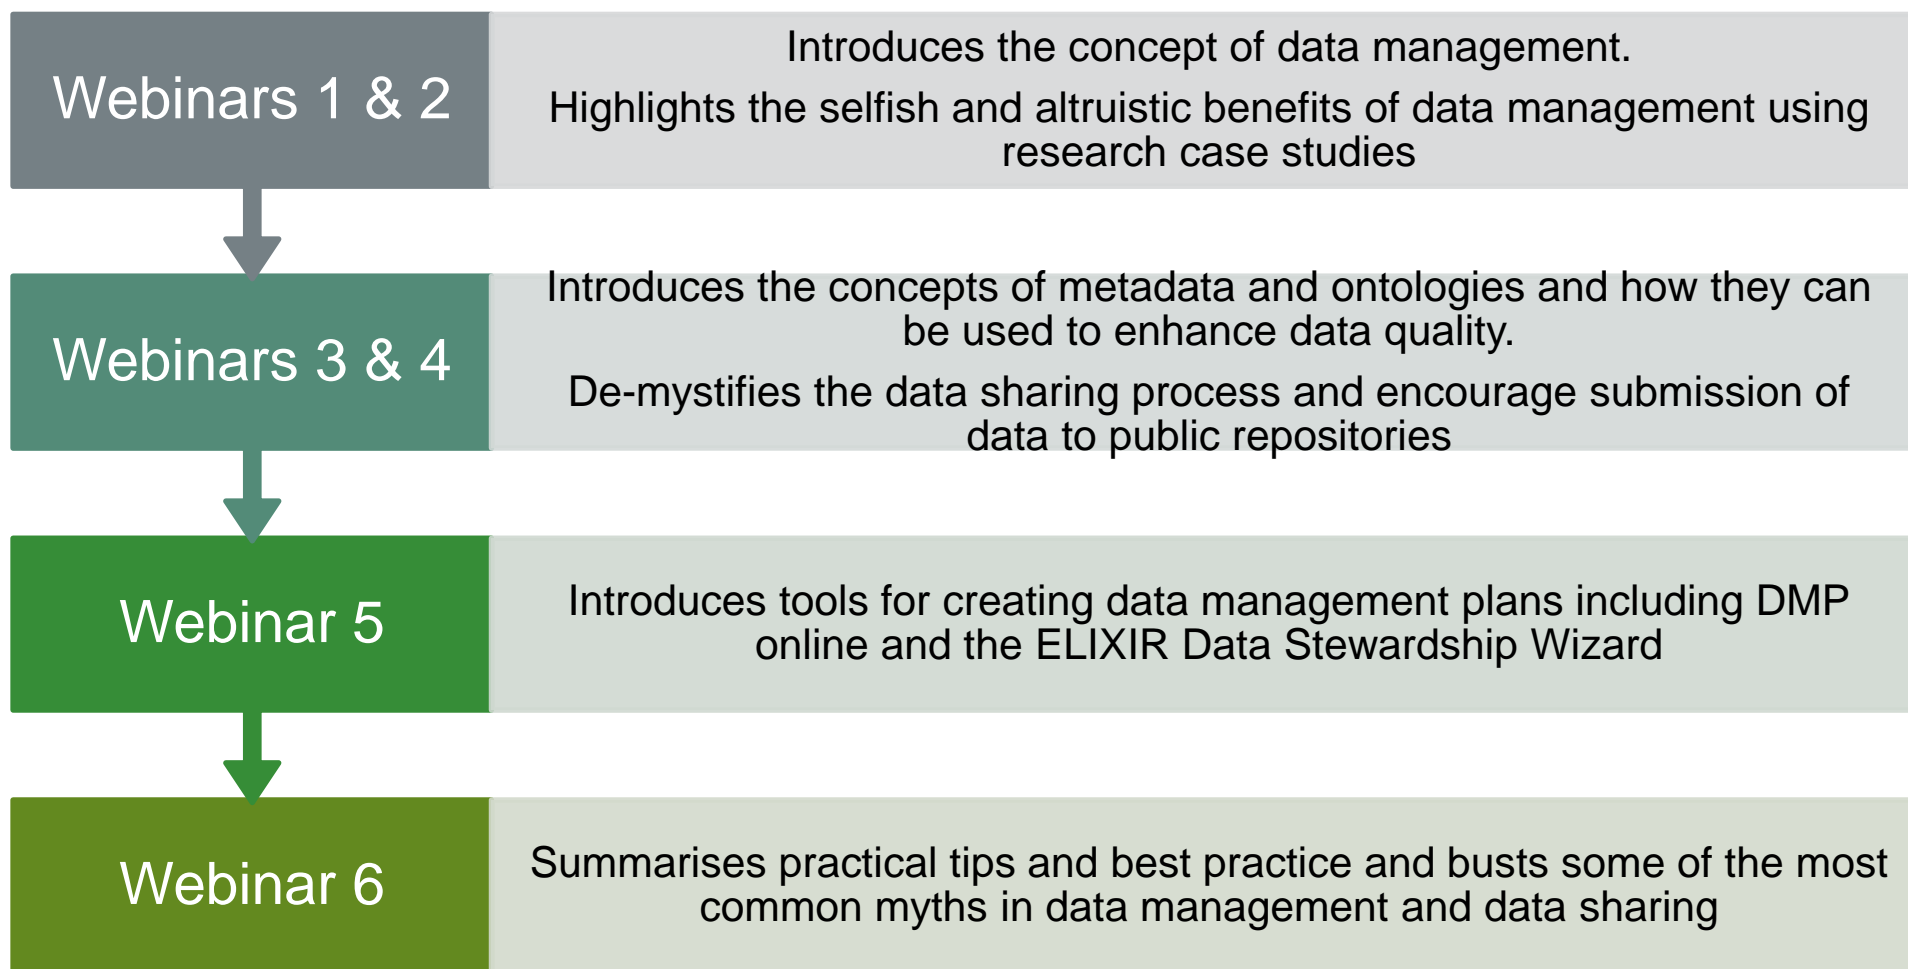

Training example 1:

Bringing data to life: data management for the biomolecular sciences

- ELIXIR-EBI webinar series
- 28 June – 2 August 2018; Watch the series in Train online <https://bit.ly/2NQgtXS>
- Audience: Biomolecular researchers
- Content: Six webinar featuring experts from EMBL-EBI, TU-DELFT, Wellcome Sanger Institute, DCC and ELIXIR
- Contact: Melissa Burke (mburke@ebi.ac.uk) and Sarah Morgan (sarahm@ebi.ac.uk)

Content in the webinars

All course materials in Train online are free cultural works licensed under a Creative Commons Attribution-ShareAlike 4.0 International license

Training Example 2: Carpentries workshops

- Pilot Software and Data Carpentry in 2015/16: 278 life sciences researchers and 63 instructors trained
- Since 2017:
 - > 40 ELIXIR courses have been delivered, many more delivered by the ELIXIR Nodes themselves
 - ELIXIR/Carpentries agreement to support the rolling out across Nodes:
 - 20 Software Carpentry and Data Carpentry workshops
 - 2 Instructor trainings
 - Nodes are building up their Carpentries trainer pools
- Contact allegra.via@uniroma1.it and pkahlem@googlemail.com

OPINION ARTICLE

Developing a strategy for computational lab skills training through Software and Data Carpentry: Experiences from the ELIXIR Pilot action [version referees: 3 approved]

Open for Science

Training Example 3:

Helis Academy

- Postgraduate courses for Data Analysis and Stewardship for Industry and Academia
- Bridge gap between industry needs and existing training programs and curricula
- Training program that
 - Improves industry-readiness of graduate students in the Health and Life Sciences
 - Upskill employees (life-long learning) in the Health and Life Sciences sector

Good Manufacturing Practices (GMP)
Clinical Testing
Data Analysis and Stewardship
Business Development
Technology & Life Sciences
Product and Process Design

- Contact: Christine Staiger & Celia van Gelder (DTL/ELIXIR-NL),
Friederike Ehrhart, Lauren Dupuis (Maastricht University)

Helis Academy

Helis Academy Data Analysis and Data Stewardship Learning Blocks

Omics Data Analysis

Transcriptomics data analysis
Multi omics integration

FAIR Data Stewardship

Data management planning
Research life cycle

Statistics

Statistical thinking
Experimental design

Machine Learning

Visual analytics for genomics
Data mining

Interreg
Vlaanderen-Nederland
Europees Fonds voor Regionale Ontwikkeling

TU/e

- Course FAIR Data Stewardship: 27-29 May 2019
<https://www.aanmelder.nl/helis-fair-data-stewardship-course>
- Course Omics Data Analysis: 11-14 June 2019
- Location: Niel, Belgium
- Courses can be followed together or separately
- Courses will be run in Belgium and Netherlands in year 2 and 3 of the project

Tool: The ELIXIR Data Stewardship Wizard

- The Data Stewardship Wizard (DSW) is a web-based application for preparing smart Data Management Plans.
- It connects to additional learning resources and helps raise awareness about DS challenges.
- <https://ds-wizard.org/>

The Wizard is for:

- **Researchers:** Support in DS Planning, Raise awareness
- **Data Stewards:** Check list DS Planning
- **Experts:** Their contact details can be linked
- **Funders / Institutes:** Customize, Domain specific
- Allows tailor made DSW instances for an organisation, a Node, a company etc.
- Contact: rob.hooft@dtls

Standards: ELIXIR FAIR Training Working Group

- chair: Mateusz Kuzak (ELIXIR-NL)
- **Task force 1: Training about FAIR data**
 - making training resources findable via TeSS, the ELIXIR Training Portal
 - Defining necessary skills for implementing FAIR data
 - developing a set of structured terms to classify the skills necessary to make data FAIR and keep it FAIR (with GO-TRAIN)
 - lead: Mateusz Kuzak (ELIXIR-NL), Fotis Psomopoulos (ELIXIR-GR)
- **Task force 2: Making training resources FAIR**
 - developing and implementing FAIR metrics for training resources ((in collaboration with Michel Dumontier and the FAIR metrics group)
 - lead: Leyla Garcia (ELIXIR-EBI), Bérénice Batut (ELIXIR-DE)

Summary

Highlights of ELIXIR Data Stewardship related activities shown

- Competencies and skills
 - Curriculum building
 - Community building: Data Steward Interest Group
 - Training, a few examples
 - Tool: ELIXIR Data Stewardship Wizard (DSW)
 - Standards: FAIR Training Working Group
-
- We welcome feedback and also invite you to participate in our activities!
 - All is open for use and reuse
