@Rob_SalGo
@SalGoTeam

1. Surround yourself by friendly people

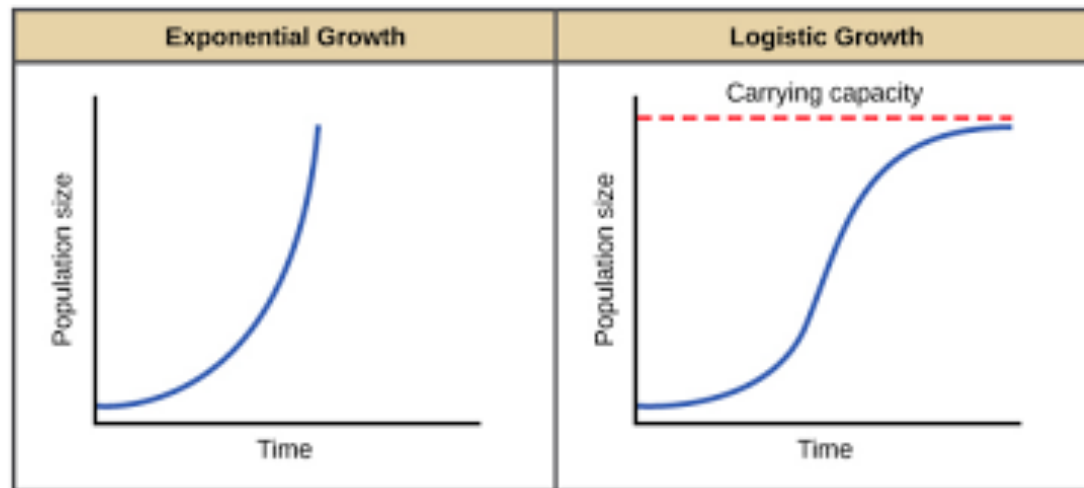

2. Be ready to compromise your needs

3. Seek skills that you are missing

4. Start small, don't grow too fast

5. Make the work as cheap as possible for everybody

6. Clear, bidirectional expectations

Take advantage of them!

e.g.: papers
never sleep

8. Recycle grant proposals across different countries!

9. Divide and conquer!

"Really? — my people always say *multiply* and conquer."
