

The Cannabinoid Eating Experience Questionnaire (CEEQ)

Please indicate how much you agree with the statements, or with what frequency a particular experience occurs, when you use cannabis

- | | |
|--|--|
| 1. Foods that I wouldn't normally eat become more appealing. | Always / Most of the time / Sometimes / Rarely / Never |
| 2. Foods taste different to me. | Always / Most of the time / Sometimes / Rarely / Never |
| 3. I feel hungrier. | Always / Most of the time / Sometimes / Rarely / Never |
| 4. I eat more than usual. | Always / Most of the time / Sometimes / Rarely / Never |
| 5. If I have already eaten a filling meal, I find myself wanting to eat again sooner than usual. | Always / Most of the time / Sometimes / Rarely / Never |
| 6. Food tastes better. | Always / Most of the time / Sometimes / Rarely / Never |
| 7. I like food more. | Never / Rarely / Sometimes / Most of the time / Always |
| 8. The sensation of chewing and swallowing food is enhanced. | Never / Rarely / Sometimes / Most of the time / Always |
| 9. The smell of food is enhanced. | Never / Rarely / Sometimes / Most of the time / Always |
| 10. I start to eat even though I feel full. | Never / Rarely / Sometimes / Most of the time / Always |
| 11. The experience of eating is better in every way. | Never / Rarely / Sometimes / Most of the time / Always |
| 12. Even if I don't feel hungry, when I taste something it is so good I want more. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 13. When I start to eat I can't stop. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 14. If the thought of food enters my head, I suddenly have the desire to eat. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 15. If someone mentions food I want to eat. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 16. If I see food, I want to eat. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 17. I continue to eat despite being full/uncomfortable. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 18. I am surprised by how much I eat. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 19. I feel hungry all the time. | Strongly disagree / Disagree / Neither disagree nor agree / Agree / Strongly agree |
| 20. No matter how much I eat, I don't feel full. | Strongly disagree / Disagree / Neither disagree nor agree / Agree / Strongly agree |
| 21. I would rather eat than do anything else. | Strongly disagree / Disagree / Neither disagree nor agree / Agree / Strongly agree |
| 22. Flavours are more complex. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 23. Tastes/flavours are more intense. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 24. I can distinguish more flavours. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 25. Food is more delicious. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 26. Food is more satisfying. | Strongly agree / Agree / Neither agree nor disagree / disagree / Strongly disagree |
| 27. Temperature sensations are more pleasant. | Strongly disagree / Disagree / Neither disagree nor agree / Agree / Strongly agree |
| 28. Texture/mouthfeel is more pleasant. | Strongly disagree / Disagree / Neither disagree nor agree / Agree / Strongly agree |

All answers should be given a score of 1 -5 from left to right. Items, 1, 2, 3, 4, 5, 6, 12, 13, 14, 15, 16, 17, 18, 22, 23, 24, 25 and 26 should be recoded before analysis (should be scored from 5-1 left – right).

Items 1, 2, 6, 7, 8, 9, 11, 22, 23, 24, 25, 26, 27, and 28 relate to the hedonic subscale

Items 3, 4, 5, 10, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, relate to the appetitive subscale.

A high score on total CEEQ and subscales is indicative of a greater cannabis related appetite effect.
