

## Supplemental Fig. S2

**Fig. S2 Peroxisome markers label tubular structures in mouse RPE** Confocal images at a single image plane of WT RPE/choroid/sclera bleached before immunolabeling with antibodies to PMP70 (green) and Pex14 (red), scale bar – 5  $\mu$ m. Lower right panel shows higher magnification view (boxed in lower left), scale bar – 2  $\mu$ m. Arrows denote examples of PMP70- and Pex14-co-labeled structures with a tubular appearance.
