

The Good Life Goals represent a practical way in which we can address the Sustainable Development Goals (SDGs) set by the United Nations in 2015 to achieve a better and more sustainable future for all. They address the global challenges we face including those related to poverty, inequality, climate, environmental degradation, prosperity and peace and justice. The Goals interconnect and in order to leave no one behind, it is important that we achieve each goal and target by 2030.

The Sustainable Development Goals (SDGs) are a collection of 17 global goals set by the United Nations in 2015 to achieve a better and more sustainable future for all. They address the global challenges we face including those related to poverty, inequality, climate, environmental degradation, prosperity and peace and justice. The Goals interconnect and in order to leave no one behind, it is important that we achieve each goal and target by 2030.

The Good Life Goals represent a practical, individual-focused perspective on different ways in which any citizen can contribute toward the huge, planet-changing objectives of the SDG agenda. They were developed through a multi-stakeholder collaboration between different countries represented by the Stockholm Environmental Institute (SEI), the Institute for Global Environmental Strategies (IGES), UNESCO and other partners.
