

The GenV guiding principles

1

Collaboration

GenV should **increase partnerships** and links between researchers, clinicians, policy makers, service providers and the community

2

Inclusivity

GenV should be **inclusive** of all partners, participants and data users

3

Sustainability

GenV should be **financially sustainable**, **leverage infrastructure and capabilities**, and be **scalable** to respond to emerging insights and needs

4

Enhancement

GenV should be **low burden to its participants** and **enhance services**

5

Systematised processes

GenV should operate via **standardised, high throughput processes** that can be embedded to become 'normal practice' in real time

6

Value

GenV should generate outstanding science and solutions that maximise children's outcomes

By 2035, GenV's vision
is to have solved
complex issues facing
our children and the
adults they become

To create the world's most exciting
children's health, development and
wellbeing project to answer
today's pressing policy and
practice questions.

Through GenV, we can reveal how
genes, biology, adversity, social
systems and services together
shape a child's life path, and how
to set the best possible path.

No other initiative has achieved
this at scale.
