

**Figure S2:** Significant differences between mean resistance scores of individual years. Only genotypes tested in all years of the respective period were regarded. The significance level is  $\alpha = 0.05$

**a. Period 2011 to 2013**

Year	mean	significance		
2011	1.345	A		
2012	0.647		B	
2013	0.489			C

b. Period 2015 to 2017

Year	mean	significance		
2015	0.759	A		
2016	1.020		B	
2017	1.271			C

c. Period 2011 to 2017

Year	mean	significance		
2011	1.370	A		
2012	0.666		B	C
2013	0.416			C
2015	0.587			C
2016	0.529			C
2017	0.990		B
