

**Date:**

***Please, comment briefly on the following statements:***

- 1) Perception is the reflection of reality in our mind.
- 2) There are no general rules for beauty, it is always a matter of one's taste (the question of aesthetic universals)
- 3) Will someone born blind because of an eye disease will recover vision if operated at an adult age ? (the Molyneux's Problem)
- 4) If a tree falls in a forest and there is nobody to listen, there is actually no sound... (that's Berkeley XVIIIc)
- 5) All we know comes from experience (that's the *tabula rasa* and Locke)

**6) The first three years of life are important for neural development because of the emotional bond established between mother and child.**

**7) Musicality goes in families suggesting that it is a genetic aptitude.**

**8) The mind controls the brain.**

**9) Language is an inborn (genetic) capacity.**

**10) In what percentage would you estimate behavior is genetic/environmental?**

10/90   30/70   50/50   70/30   90/10

**11) We only use 10% of our brain**
