Apa itu Publish or Perish?

Publish or Perish is a software program that retrieves and analyzes academic citations. It uses a variety of data sources (incl. [Google Scholar](#) and [Microsoft Academic Search](#)) to obtain the raw citations, then analyzes these and presents the [following metrics](#):

- ☐ Total number of papers and total number of citations
- ☐ Average citations per paper, citations per author, papers per author, and citations per year
- ☐ Hirsch's h-index and related parameters
- ☐ Egghe's g-index
- ☐ The contemporary h-index
- ☐ Three variations of individual h-indices
- ☐ The average annual increase in the individual h-index
- ☐ The age-weighted citation rate
- ☐ An analysis of the number of authors per paper.
