Title Strengthening mental health care systems for Syrian refugees in Europe and the Middle East: integrating scalable psychological interventions in eight countries

Published in European journal of psychotraumatology, November 2017

DOI 10.1080/20008198.2017.1388102

Pubmed ID 29163867

Authors Marit Sijbrandij, Ceren Acarturk, Martha Bird, Richard A Bryant, Sebastian Burchert, Kenneth Carswell, Joop de Jong, Cecilie Dinesen, Katie S. Pfaltz, Leontien Ruttenberg, Matthis Schick, Ulrich Schnyder, Mark van Ommeren, Peter Ventevogel, Inka Weissbecker, Erica Weitz, Nana Wiedemann, Claire Whitney, Pim Cuijpers

Abstract The crisis in Syria has resulted in vast numbers of refugees seeking asylum in Syria's neighbouring countries as well as in Europe. Refugees are at considerable risk of developing common mental disorders, including depression, anxiety, and posttraumatic stress disorder (PTSD). Most refugees do not have access to mental health services for these problems because of multiple barriers in national and refugee specific health systems, including limited availability of mental health professionals. To counter some of challenges arising from limited mental health system capacity the World Health Organization (WHO) has developed a range of scalable psychological interventions aimed at reducing psychological distress and improving functioning in people living in communities affected by adversity. These interventions, including Problem Management Plus (PM+) and its variants, are intended to be delivered through individual or group face-to-face or smartphone formats by lay, non-professional people who have not received specialized mental health training. We provide an evidence-based rationale for the use of the scalable PM+ oriented programmes being adapted for Syrian refugees and provide information on the newly launched STRENGTHS programme for adapting, testing and scaling up of PM+ in various modalities in both neighbouring and European countries hosting Syrian refugees.

Geographical breakdown Demographic breakdown

Improve our understanding of LSE's research visibility beyond academia

The screenshot displays the LSE Research Online interface. The main header includes the LSE logo (circled in red) and the text "Exploring data for all research outputs from London School of Economics and Political Science". A navigation bar contains tabs for HIGHLIGHTS, RESEARCH OUTPUTS, TIMELINE, DEMOGRAPHICS, MENTIONS, MENTION SOURCES, and JOURNALS. The central dashboard features three key metrics: Total mentions (285,429), Outputs with attention (13,710), and Total outputs tracked (30,063). Below these is an "Attention breakdown" bar chart and a table of source categories: Social media (251,635 mentions), News and blogs (20,949 mentions), Policy and patents (9,505 mentions), Other sources (3,233 mentions), and Academic sources (107 mentions). The "Top outputs" section shows an article titled "Alcohol use and burden for 195 countries and territories, 1990–2016: a..." with 8,134 mentions, published in The Lancet in September 2018. The "Most mentioned by" section identifies the National Bureau of Economic Research as the top source with 2,432 mentions. A sidebar on the left contains a search bar, a document viewer for "Why inequality could spread COVID-19", and a social media sharing menu (circled in red) with options for Twitter, Facebook, LinkedIn, and others.
