## Description of Government entities with a role in food policy

Description of Government entities with a role in food policy	
Key Government entities	Descriptions
Ministry for Primary Industries	Main policy making department for New Zealand's primary industries, including food. Functions include providing national direction on ensuring the food we produce is safe, enabling international market access for New Zealand's primary products, and representing the interests of the New Zealand primary sector in international trade policy and standard-setting forums.
Ministry of Foreign Affairs and Trade	Main policy-making department on international food trade, overseas aid (including food aid), overseas agriculture, and the Sustainable Development Goals.
Ministry of Health	Main policy-making department on diet-related health; nutrition-related health inequalities, planning and funding public health and monitoring the performance of District Health Boards.
Health Promotion Agency	Main communications agency to promote health, including healthy diets
Ministry for the Environment	Main policy-making department on environmental policy and provides national direction on urban (eg food density zoning laws) and rural planning (e.g., land use consents) through National Policy Statements and National Environment Standards. Also focuses on climate change, fresh water, marine, land, waste, soil, air, water, sea quality.
Ministries of Business, Innovation and Employment	Main policy-making department managing food and beverage industry investment, consumer protection, immigration (including migrant workers for food supply chain), business, industrial strategy, employment, energy, science, research and innovation (all with food relevance).
Food Standards Australia New Zealand	Develops and administers joint Australia and New Zealand food standards; explain food issues e.g., labelling, additives, chemicals; consult with the community about food safety issues; help food businesses understand the Food Standards Code.
Ministry of Education	$\label{thm:main-policy-making-department} \ \ \text{on education, skills and curriculum, with role as food educator and food provider.}$
Office of the Prime Minister's Chief Science Advisor	Provides strategic advice across sectors and serves as an accessible conduit between the science community and government.
Local Government	Ensures public services are responsive to the social, economic, environmental and cultural well-being needs of their communities with a particular role in zoning law, district or regional planning and community food supply initiatives for example.
District Health Boards	A role to improve, promote and protect the health of people and communities, including planning and delivering services in their area.
The Treasury	Overall control of government spending.
Department of Prime Minister and Cabinet	Overall policy oversight and coordination. Contains the Child Wellbeing and Poverty Reduction Group.
Te Puni Kokiri - Ministry of Māori Development	Input into major food policies as they relate to Māori.
Ministry for Pacific Peoples	Input into major food policies as they relate to Pacific People.
