

SEMI-STRUCTURED EXPERT INTERVIEW: GUIDE

This document is part of the appendix of Model-Driven Development in the Content Management System Domain: Empirical Assessment during Common Development Scenarios by Priefer et al.

Following, the interview guide is presented, which was used during the interview sessions.

- Is it ok that I record the interview?
 - If we publish the results, all personal data will be made anonymous.
- Did you develop an extension?
 - How long have you develop in Joomla?
 - Since what version?
 - What kind of extension did you develop?
 - What size has the extension?
 - How many views?
 - What complexity has the extension?
 - * Cross-references between views?
 - * Level of individuality?
 - What is your procedure to implement a new component?
 - Dependant extensions (component <-> module)
 - How long did it take to develop the extension?
- What is your procedure to augment a component?
- Did you ever try to use parts of a third party component in your own extension?
- Did you migrate an extension from one Joomla version to another?
 - How long did it take?
- Did you ever experience that the Joomla conventions (file structure/naming) lead to errors in your extensions?
 - How often did it happen?
- In which scenario do you think that a generator approach might be useful?
- In which scenario do you think that a generator approach is not suitable?
- Which functionality do you expect from a generator tool?
