

# **EDM performance characteristics and electrochemical corrosion analysis of Co-Cr alloy and duplex stainless steel: A comparative study**

Amit Mahajan, Gurpreet Singh, Sandeep Devgan, Sarabjeet Singh Sidhu

## **Supplementary Tables**

**Table S1:** Properties and specifications of workpiece materials.

| Property                        | Co-Cr alloy  | Duplex Stainless Steel   |
|---------------------------------|--|--|
| Chemical composition            | Co:63.6%, Cr:28.5%, Mo:6%, Si:0.7%, Mn:0.5%, Ni:0.25%, C:0.22%, Fe:0.2%, Ti:0.01%, P:0.02% | Fe:66.93%, Cr:22.81%, Ni:5.2%, Mo:3.05%, Mn:1.43%, Si:0.5%, C:0.028%, P:0.03%, S:0.02% |
| Workpiece size (mm)             | 60 x 40 x 20   | 60 x 40 x 20   |
| Density (g/cm <sup>3</sup> )    | 8.3  | 7.8  |
| Melting point (°C)              | 1330   | 1350   |
| Thermal conductivity (W/mK)     | 9.4  | 19 at 100°C  |
| Specific heat capacity (J/Kg°C) | 390  | 418  |
| Electrical resistivity (Ω cm)   | 6 x 10 <sup>-6</sup>   | 0.085 x 10 <sup>-6</sup>   |
| Modulus of Elasticity (GPa)     | 216  | 200  |
| Tensile Strength (MPa)          | 920  | 621  |
| Rockwell Hardness (HRC)         | 34   | 31   |

**Table S2:** Properties and specifications of tool electrode.

| Property                              | Graphite               | Tungsten               | Copper-Tungsten |
|---------------------------------------|------------------------|------------------------|-----------------|
| Diameter (mm)                         | 10                     | 10                     | 10              |
| Density (g/cm <sup>3</sup> )          | 2.26                   | 18.8                   | 14.5            |
| Melting point (°C)                    | 3650                   | 3400                   | 3410            |
| Electrical resistivity (Ω cm)         | 6.0 x 10 <sup>-3</sup> | 5.6 x 10 <sup>-3</sup> | 4.5             |
| Thermal conductivity (W/mK)           | 24                     | 163.3                  | 189             |
| Thermal expansion coefficient (μm/mK) | 6                      | 4.5                    | 11.7            |
| Specific heat capacity (J/Kg°C)       | 720                    | 133                    | 214             |
| Hardness (HB)                         | 10                     | 2570                   | 195             |

**Table S3:** Machining variables and their values.

| Variable                                 | Description                         |
|--|-------------------------------------|
| Dielectric medium                        | EDM oil                             |
| Flushing pressure (kgf/cm <sup>2</sup> ) | 0.6 (side flushing)                 |
| Current (A)                              | 5, 10, 16                           |
| Pulse-on-time (μs)                       | 60, 150, 200                        |
| Pulse-off-time (μs)                      | 60, 150, 200                        |
| Electrode                                | Graphite, Tungsten, Copper-Tungsten |
| Polarity                                 | Tool (+), Workpiece (-)             |

**Table S4:** Corrosion parameters evaluated by Tafel polarization curves.

| Specimen alloy  | E <sub>corr</sub> (mV) | I <sub>corr</sub> (μA/cm <sup>2</sup> ) | Corrosion rate (mm/year) | Polarization resistance (kΩ) |
|-----------------|------------------------|---|--------------------------|------------------------------|
| Untreated Co-Cr | -136.26                | 0.1812                                  | 0.0020251                | 386.680                      |
| Untreated DSS   | -154.11                | 1.8112                                  | 0.19157                  | 54.816                       |
| EDMed Co-Cr     | -120.27                | 0.0351                                  | 0.000387                 | 2677.4                       |
| EDMed DSS       | -119.83                | 0.7215                                  | 0.007632                 | 178.33                       |
