## **TREND Statement Checklist**

Blinding (masking)	9	Whether or not participants, those administering the interventions, and those assessing the outcomes were blinded to study condition assignment; if so, statement regarding how the blinding was accomplished and how it was assessed.	N/A	N/A
Unit of Analysis	10	Description of the smallest unit that is being analyzed to assess intervention effects (e.g., individual, group, or community)	Yes	9-13
		<ul> <li>If the unit of analysis differs from the unit of assignment, the analytical method used to account for this (e.g., adjusting the standard error estimates by the design effect or using multilevel analysis)</li> </ul>	N/A	N/A
Statistical Methods	11	Statistical methods used to compare study groups for primary methods outcome(s), including complex methods of correlated data	Yes	13-14
		Statistical methods used for additional analyses, such as a subgroup analyses and adjusted analysis	Yes	13-14
		Methods for imputing missing data, if used	N/A	N/A
		Statistical software or programs used	N/A	N/A
Results				
Participant flow	12	Flow of participants through each stage of the study: enrollment,	Yes	15
		assignment, allocation, and intervention exposure, follow-up, analysis (a		
		diagram is strongly recommended)	No	
		<ul> <li>Enrollment: the numbers of participants screened for eligibility, found to be eligible or not eligible, declined to be enrolled, and enrolled in the study</li> </ul>	INO	
		Assignment: the numbers of participants assigned to a study condition	Yes	15
		<ul> <li>Allocation and intervention exposure: the number of participants assigned to each study condition and the number of participants who received each intervention</li> </ul>	Yes	15
		<ul> <li>Follow-up: the number of participants who completed the follow-up or did not complete the follow-up (i.e., lost to follow-up), by study condition</li> </ul>	Yes	15
		<ul> <li>Analysis: the number of participants included in or excluded from the main analysis, by study condition</li> </ul>	Yes	15
		Description of protocol deviations from study as planned, along with reasons	N/A	N/A
Recruitment	13	Dates defining the periods of recruitment and follow-up	Yes	7
Baseline Data	14	Baseline demographic and clinical characteristics of participants in each study condition	Yes	14-15
		Baseline characteristics for each study condition relevant to specific disease prevention research	N/A	N/A
		Baseline comparisons of those lost to follow-up and those retained, overall and by study condition	No	
		Comparison between study population at baseline and target population of interest	No	
		5		

## **TREND Statement Checklist**

		T	,	
Numbers analyzed	16	Number of participants (denominator) included in each analysis for each study condition, particularly when the denominators change for different outcomes; statement of the results in absolute numbers when feasible	Yes	15
		<ul> <li>Indication of whether the analysis strategy was "intention to treat" or, if not, description of how non-compliers were treated in the analyses</li> </ul>	No	
Outcomes and estimation	17	For each primary and secondary outcome, a summary of results for each estimation study condition, and the estimated effect size and a confidence interval to indicate the precision	Yes	16
		Inclusion of null and negative findings	Yes	16
		Inclusion of results from testing pre-specified causal pathways through which the intervention was intended to operate, if any	N/A	N/A
Ancillary analyses	18	Summary of other analyses performed, including subgroup or restricted analyses, indicating which are pre-specified or exploratory		17-22
Adverse events	19	Summary of all important adverse events or unintended effects in each study condition (including summary measures, effect size estimates, and confidence intervals)	N/A	N/A
DISCUSSION				
Interpretation	20	<ul> <li>Interpretation of the results, taking into account study hypotheses, sources of potential bias, imprecision of measures, multiplicative analyses, and other limitations or weaknesses of the study</li> </ul>	Yes	23-26
		Discussion of results taking into account the mechanism by which the intervention was intended to work (causal pathways) or alternative mechanisms or explanations	Yes	23-26
		Discussion of the success of and barriers to implementing the intervention, fidelity of implementation	Yes	23-27
		Discussion of research, programmatic, or policy implications	N/A	N/A
Generalizability	21	<ul> <li>Generalizability (external validity) of the trial findings, taking into account the study population, the characteristics of the intervention, length of follow-up, incentives, compliance rates, specific sites/settings involved in the study, and other contextual issues</li> </ul>		23-24
Overall Evidence	22	General interpretation of the results in the context of current evidence and current theory	Yes	23-27
