Google Scholar

Google Scholar

Global ID's & Publicizing Research

What is Google Scholar?

Search for Scholarly Literature (e.g. Articles, Theses, Books, Abstracts, etc.)

Features of Google Scholar

- Search all scholarly literature from one convenient place
- Explore related works, citations, authors, and publications
- Locate the complete document through your library or on the web
- Keep up with recent developments in any area of research
- Check who's citing your publications, create a public author profile

Why G.Scholar Important?

- To increase your visibility as an author as well as the visibility of your publications.
- To track citations of your articles (see who is citing you & graph citations over time).

Why G. Scholar Important?

- Google Scholar Citations
 - Keep track of the citations of your articles
 - Who is citing them
 - Graph over time

Metrics

Citation indices	All	Since 2012
Citations	1623	883
h-index	20	16
i10-index	53	29

- Private/public
 - If public, seen in a Google Scholar search for your name!

Create an Author Profile

- Sign up for a Google Scholar
 Citations profile.
- Create a regular Google account, or sign in to the one you already have.

One account. All of Google.

7 ways to Improve your GS Profile

- Clean up your Google Scholar Profile data.
- 2. Add missing publications to your Profile.
- 3. Increase your "Google ability".
- 4. Use your Google Scholar Profile data to get ahead.
- 5. Stay up-to-date when you've been cited.
- 6. and stay up-to-date on your colleagues and competitors, too.
- 7. Tell Google Scholar how it can improve.

4 reasons why GS isn't as great as you think it is

- Google Scholar Profiles include dirty data.
- 2. Google Scholar Profiles may not last.
- 3. Google Scholar Profiles won't allow itself to be improved upon.
- 4. Google Scholar Profiles only measure a narrow kind of scholarly impact.

Publons Profile

Global ID's & Publicizing Research

THOMSON REUTERS

ENDNOTE™

www.uokufa.edu.iq

- Publons was founded by Andrew Preston and Daniel Johnston in 2012 to address the static state of peer-reviewing practices in scholarly communication, with a view to encourage collaboration and speed up scientific development.
- The world's researchers now use Publications to keep track of their publications, citation metrics, peer reviews and journal editing work in a single, easy-to-use profile.
- Publons was acquired in 2017 by Clarivate Analytics

Over 630,000 researchers

Use Publons to track your publications, citation metrics, peer reviews, and journal editing work in a single, easy-to-maintain profile.

Trusted citation metrics, automatically imported from the *Web of Science Core Collection.*

• Correct author attribution, with your unique ResearcherID automatically added to the publications you claim in Web of Science collections.

Your verified peer review and journal editing history, powered by partnerships with thousands of scholarly journals.

Downloadable record summarising your scholarly impact as an author, editor and peer reviewer.

About me

Introduction

Nabeel Salih Ali received the BSc. in computer science from University of Technology, Baghdad, Iraq, on September 2003, and the MSc. in Computer Science (Internetworking Technology) from the University Technical Malaysia Melaka (UTeM), Malaysia, on July 2015. My research works in Web Applications Security Techniques to improve the security and survivability of computer systems. In addition, Healthcare Monitoring Systems, Internet of Things (IoT).

Here's what's new:

A new score, called Research Interest, will give you better insights into scientists' interest in each of your research items.

A simple total of your Research Interest helps you keep track of interest in all of your research items in a convenient way. See it on your stats page

A way to see the interest your research items are getting compared to others in their field or year of publication.

About me

Edit 🔗

Introduction

Nabeel Salih Ali received the BSc. in computer science from University of Technology, Baghdad, Iraq, on September 2003, and the MSc. in Computer Science (Internetworking Technology) from the University Technical Malaysia Melaka (UTeM), Malaysia, on July 2015. My research works in Web Applications Security Techniques to improve the security and survivability of computer systems. In addition, Healthcare Monitoring Systems, Internet of Things (IoT).

ORCID

ORCID Profile

Global ID's & Publicizing Research

Contents

ORCID Researcher Profile

Open Researcher and Contributor ID

- ORCID provides unique persistent identifiers for the benefit of both individual researchers and their institutions.
- launched its global, free-to-use registry to provide researchers with unique persistent identifiers (ORCID IDs).
- ORCID has the potential to make a huge difference to a researcher's ability to gain full credit for their work and
- ORCID is a useful tool for universities as they track, evaluate and report research work.

Open Researcher and Contributor ID

- ORCID is a nonprofit helping create a world in which all who participate in research, scholarship and innovation are uniquely identified and connected to their contributions and affiliations, across disciplines, borders, and time.
- ORCID serves a broad stakeholder community that includes individuals, research and scholarly organizations, data repositories and libraries, publishers, patent offices, service providers, and more...

What is ORCID?

- An open, non-profit, community-based effort to create and maintain a registry of unique research identifiers and a transparent method of linking research activities and outputs to these identifiers
- ORCID provides a standard unique author identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized.

What is ORCID?

- ORCID Registry aims to prevent authorship confusion
- Some publishers will require an ORCID ID in the ScienCV platform, for linking researchers, their grants and their scientific output
- To create your own ORCID ID, simply go to the ORCID website--http://orcid.org/-- and register

- By a unique identifier, as provided by ORCID, which researchers can associate with their name variations and their research works,
- It is a way to ensure that these links can be made accurately and reliably. This will help Nabeel S. to get credit for his publications by uniquely identifying his as the author of his work across all systems integrated with the ORCID registry.

 ORCID has over Ten Million members from the research and scholarly community including major funders, universities and publishers. Many of them have started to embed ORCID ID's in research workflows such as manuscript submission or grant application processes so that it becomes part of the metadata associated with research outputs. Nature is just one example. When funder or publisher systems are integrated with the ORCID registry, public information linked to an ORCID ID could eventually pre-populate grant or manuscript submission forms reducing the administrative burden for researchers.

Connecting Research and Research

Create ORCID Account

Create ORCID Account

Already have an ORCID iD? Sign In Per ORCID's terms and conditions, you may only register for an ORCID iD for yourself. First name 0 Last name (Optional) Primary email Additional email (Optional) Add another email Password 8 ⊗ 8 or more characters

Create ORCID Account

Visibility settings

Your ORCID iD connects with your ORCID record that can contain links to your research activities, affiliations, awards, other versions of your name, and more. You control this content and who can see it. **More information on visibility settings**.

By default, who should be able to see information added to your ORCID Record?

- Everyone (87% of users choose this)
- Trusted parties (5% of users choose this)
- Only me (8% of users choose this)

Notification settings

ORCID sends email notifications about items related to your account, security, and privacy, including requests from ORCID member organizations for permission to update your record, and changes made to your record by those organizations.

You can also choose to receive emails from us about new features and tips for making the most of your ORCID record.

Please send me quarterly emails about new ORCID features and tips

To receive these emails, you will also need to verify your primary email address.

After you've registered, you can change your notification settings at any time in the account settings section of your ORCID record.

Terms of Use

☐ I consent to the **privacy policy** and **terms and conditions** of use, including agreeing to my data being processed in the US and being publicly accessible where marked Public.

You must accept the terms and conditions.

ORCID Protects Your Unique Scholarly Identity

- ORCID solves the author name problem by giving individuals a unique, 16-digit numeric identification number that lasts over time.
 - The numbers are stored in a central registry, which will power a research infrastructure that ensures that people find the correct "J Wang" and get credit for all their publications.

Creating an ORCID Identifier Takes 30 Seconds

Setting up an ORCID record is easier than setting up a Facebook account, and literally only takes 30 seconds. Plus, if you've published before, you likely already have a Researcher-ID or Scopus Author ID, or you may have publications indexed in Cross-Ref which means that you can easily import information from those systems into your ORCID record, letting those websites do the grunt work for you.

ORCID is Getting Big Fast

Even if you haven't yet encountered ORCID, you likely will soon. The number of ORCID users grew ten-fold over 2013, and continues to grow daily. You'll likely encounter ORCID identifiers more and more often on journal websites and funding applications—a great reason to better understand ORCID's purpose and uses.

ORCID is Getting Big Fast

Growth in ORCID identifiers, from Oct. 2012-Mar. 2014

ORCID Lasts Longer Than Your Email Address

Anyone who has ever moved institutions knows the pain of losing touch with colleagues once access to your old university email disappears. ORCID eases that pain by storing your most recent email address. If you choose to share it, your email address can be shared across platforms—meaning you spend less time updating your many profiles.

ORCID Supports 37 Types of "Works," From Articles To Dance Performances

Any type of scholarly output you create, ORCID can handle. Are you a traditional scientists, who writes only papers and the occasional book chapter? ORCID can track them. Are you instead a cutting-edge computational biologist who releases datasets and figures for your thesis, as they are created? ORCID can track that, too. Not a scientist at all, but an art professor? You can import your works using ORCID, as well, ORCID will even start importing information about your service to your discipline soon!

You Control Who Views Your ORCID Information

Concerned about the privacy implications of ORCID? You're in luck—ORCID has granular privacy controls. When setting up your ORCID record, you can select the default privacy settings for all of your content—Open to everyone, Open to trusted parties (web services that you've linked to your ORCID record), or Open only to yourself. Once your profile is populated, you can set custom privacy levels for each item, easy as pie.

ORCID is Glue for All Your Research Services

You can connect your ORCID account with websites including Web of Science, Fig share, and Impact story, among many others. Once they're connected, you can easily push information back and forth between services meaning that a complete ORCID record will allow you to automatically import the same information to multiple places, rather than having to enter the same information over and over again on different websites. And new services are connecting to ORCID every day, sharing information across an increasing number of platforms repositories, funding agencies, and more!

Journals, Funders & Institutions Are Moving to ORCID

• Some of the world's largest publishers, funders, and institutions have adopted ORCID. Over 1000 journals, including publications by PLOS, Nature, and Elsevier, are using ORCID as a way to make it easier for authors to manage their information in manuscript submission systems.

ORCID can also collect your publications from across these varied services, making it possible to aggregate author-level metrics. Funding agencies are integrating their systems with ORCID for similar reasons

Journals, Funders & Institutions Are Moving to ORCID

Funders from the Welcome Trust to the NIH now request that grantees use ORCIDs to manage information in their systems, and many other funding agencies across the world are following suit.

3

In 2013, universities accounted for the largest percentage of all new ORCID members. ORCID helps institutions track your work, compile information for university-level reporting (i.e., total funding received by its scholars), and more efficiently manage information on faculty profiles.

Journals, Funders & Institutions Are Moving to ORCID

By eliminating redundancies and automating some reporting functions, ORCID will be especially helpful in reducing time and monies spent on REF and other assessment activities.

When Everyone Has An ORCID Identifier, Scholarship Gets Better

How many hours have you wasted by filling in your address, employment history, collaborator names and affiliations, etc. when applying for grants or submitting manuscripts? For many publishers and funders, you can now simply supply your ORCID identifier, saving you precious time to do research. In addition to increasing efficiency, ORCID can also help connect funding dollars with tangible outputs, track citations beyond journal articles, and help keep author contact information up-to-date.

ORCID Is Open Source, Open Data, And Community-driven

shape its development by adding and voting for ideas on ORCID's feedback forum. It's also open by design. ORCID is an open source web-app that allows other web-apps to use its open API and mine its open data. (We actually use ORCID's open API to easily import information into your Impact story profile).

ORCID Is Open Source, Open Data, and Community-driven

Openness like ORCID's supports innovation and transparency, and can keep us from focusing myopically on limited publication types or single indicators of impact. And there we have it—ten things you now know about ORCID.
