

Supplementary Material

Table 1 Overview over annual data availability

YEAR	Acoustic logs	Trawl stations	Length measured fish	Aged fish	Rectangles covered	Missing cruises
1996	1783	105	16613	6115	96	-
1997	1743	104	14188	5334	94	Argos
1998	1943	75	10644	4501	77	Argos
1999	1761	69	5004	3798	90	Walther Herwig
2000	6217	53	4210	1987	114	-
2001	4364	27	3126	1163	90	Walther Herwig
2002	4516	45	2016	1273	96	-
2003	6218	69	3599	2133	130	TFNA
2004	5234	79	6464	2435	110	OXBH
2005	10567	80	10020	3665	161	-
2006	11330	85	7033	2889	149	-
2007	7611	96	11059	2973	125	OXBH
2008	8328	65	10199	2476	132	-
2009	5206	59	9359	2253	135	-
2010	8085	53	5547	1656	156	-
2011	5067	57	7312	1903	147	-
2012	11100	53	6047	1995	153	-
2013	10097	71	7493	2275	156	-
2014	10565	58	6480	1924	147	-
2015	10243	61	6487	2026	148	-
2016	8677	82	8668	2450	139	-
2017	8508	75	8538	2459	138	-
2018	8010	86	10682	3073	141	-
2019	8543	56	7079	2293	144	-
2020	10168	69	7063	2250	124	-

Table 2 Overview over cruises used in the analysis. Vessel names corresponding to vessel codes are found in Table 3

Year	Country	Vessel Code	Cruise
1996	FO	OW2252	9632
1996	IS	TFJA	A6-96
1996	NO	LLZG	1996007

Year	Country	Vessel	Cruise
			Code
1997	FO	OW2252	9736

Table 3 Vessels participating in the IESNS survey

Vessel Code	Vessel Name
LDGJ	Johan Hjort
LFTI	M.Ytterstad
LJBD	Nybo
LLZG/LMEL	G.O.Sars
OW2252	Magnus Heinason
OXBH	Dana
PBVO	Tridens
TFJA/TFNA	Arni Fridriksson

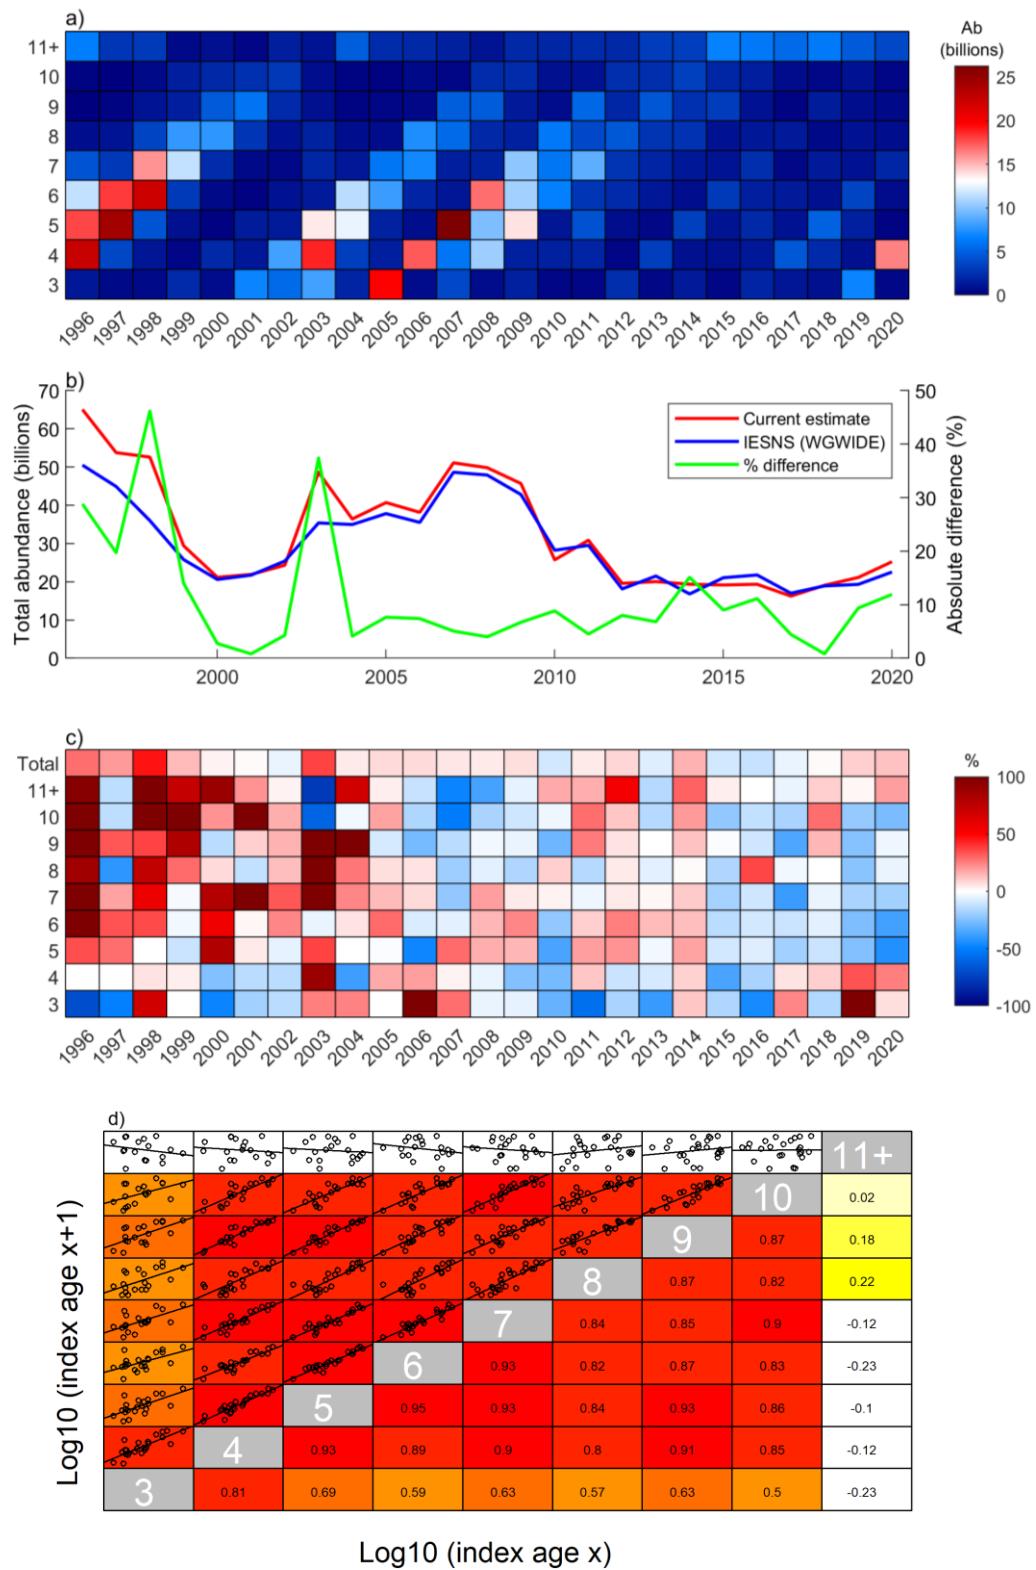

Figure 1 Data check where the data used in the paper are compared with data from the WGWHITE group (ICES 2020, table 4.4.7.3). a) Calculated abundances of age classes 3-11+ in the period 1996-2020 indicated with colour coding. b) Comparison of total abundances. c) Differences (%) in abundances between current calculations and ICES (2020). d) Consistency between the same year classes at consecutive ages in our calculations.

Figure 2 (First page) Distribution of different ages in the stock in May (1996-2008). The thickness of the map frames indicates the strength of each year-class at age 5 (ICES, 2021).

Figure 2 (Second page) Distribution of different ages in the stock in May (2009–2020). The thickness of the map frames indicates the strength of each year-class at age 5 (ICES, 2021). No information about year class strength at age 5 is available for year classes after 2016, and thus no line surrounds this frame.
