

Supplementary Material

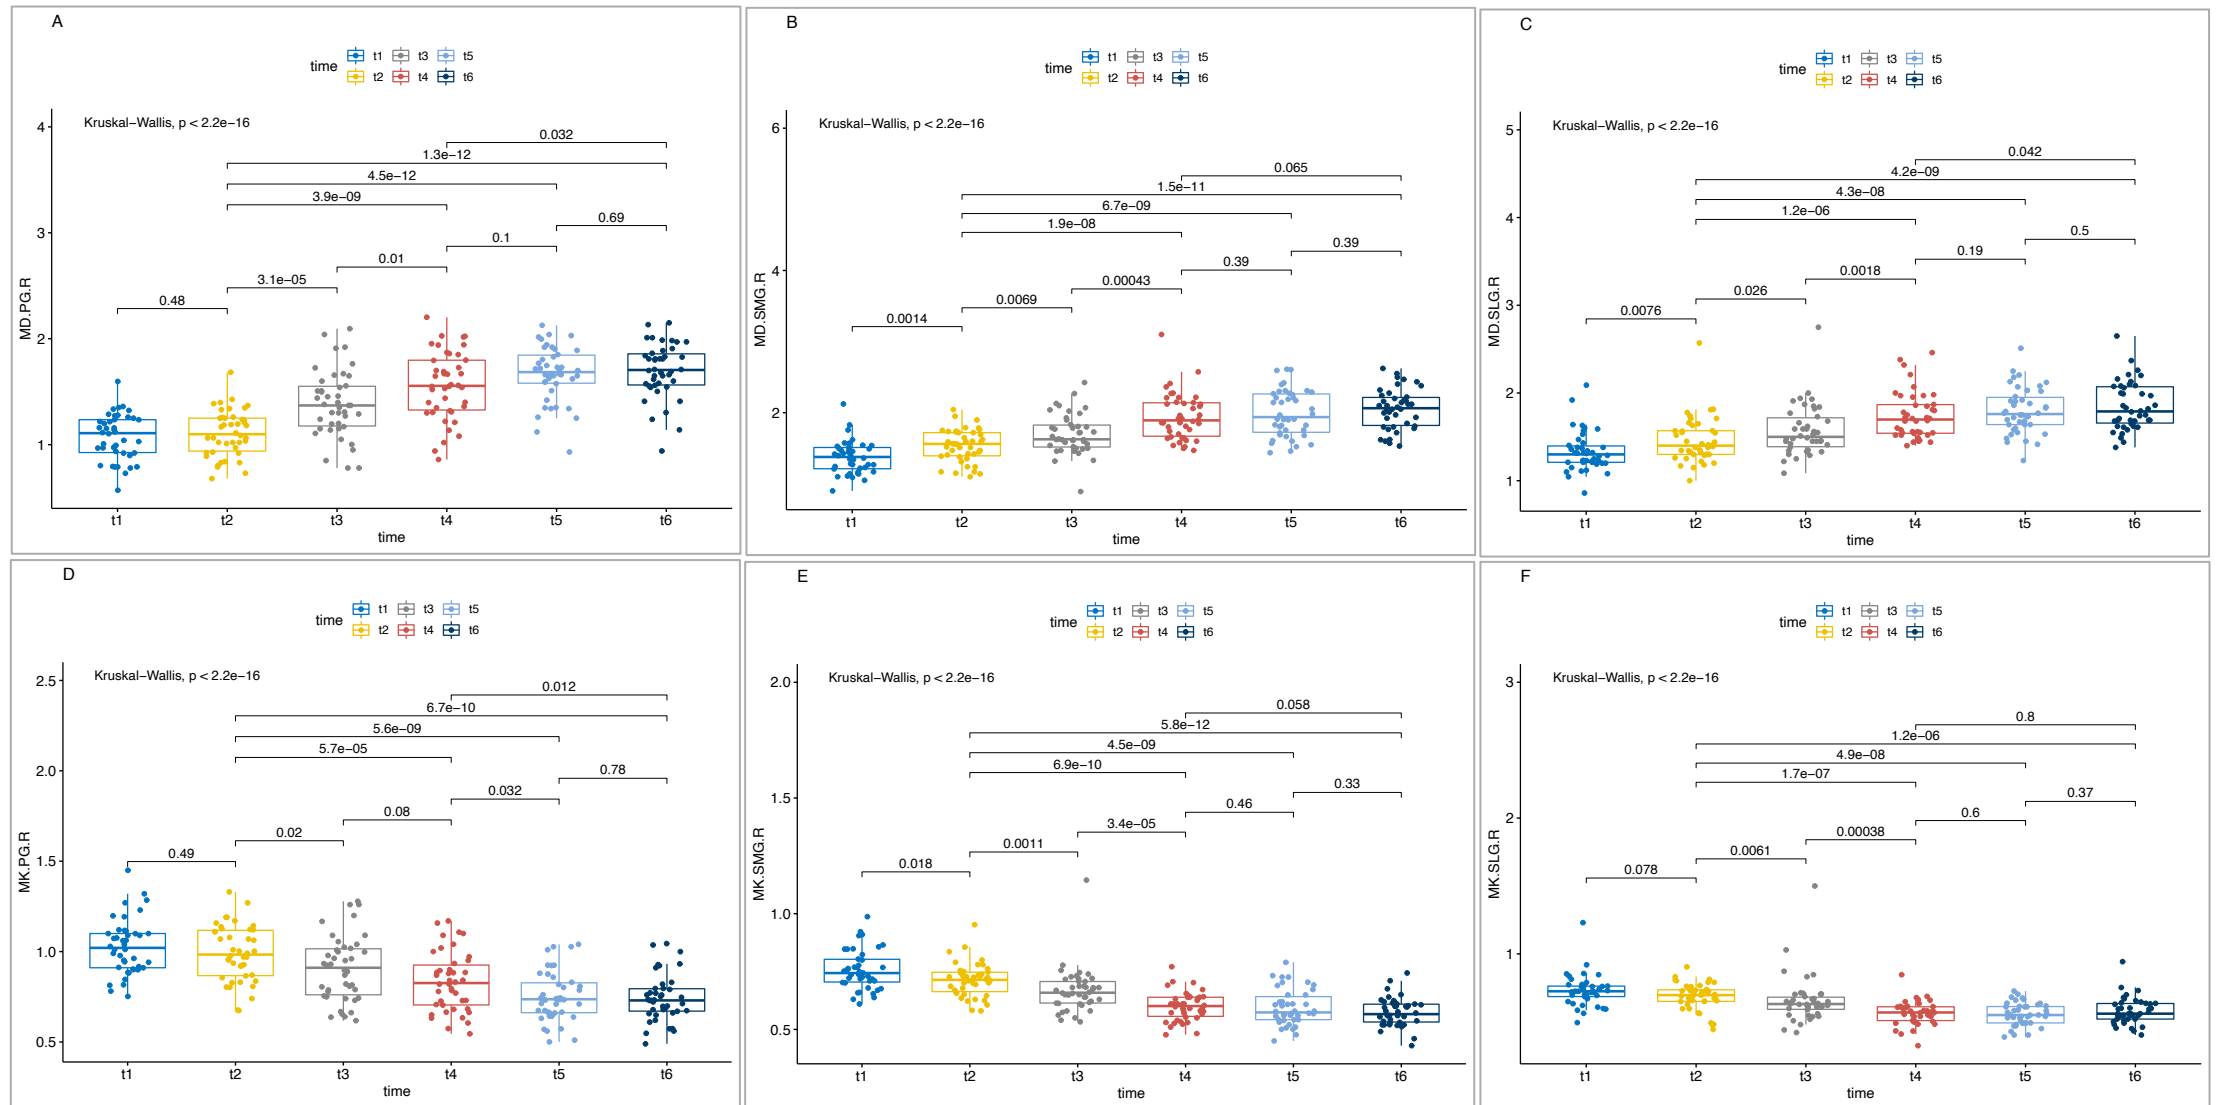

Fig.7 A~F the pairwise comparisons of MD and MK of right PG, SMG, between different time points, $p < 0.05$ denotes significant differences between two time points linked together. MD: mean diffusion; MK: mean kurtosis. PG: parotid gland; SMG: submandibular gland; SLG: sublingual gland. time: t1:prior to induction chemotherapy; t2: prior to radiotherapy; t3: middle of radiotherapy; t4: immediately after radiotherapy; t5: 1 months after radiotherapy; t6: 3 months after radiotherapy.
