# Abstract

Numerous university ranking systems directly or indirectly rely on research visibility and impact. So, research visibility and impact play a major role in university rankings. The visibility for high-quality research and publications is usually high. However, very few researchers may do high-quality research that causes them to receive well-known awards like the Nobel Prize. The majority of researchers are doing moderate-quality research, which needs to be promoted well for being visible and getting an impact in the future. To improve the visibility and impact of research, universities should focus on several strategies such as online profile building, networking and collaboration, effective publication and dissemination channels, and social media engagement. These strategies help researchers to enhance their visibility and impact of research that, in turn, helps in improving the ranking of universities. In this webinar, [Nader Ale Ebrahim](#) (A Research Visibility and Impact Consultant) explains how research visibility and impact influence university rankings, as well as presents various "[Research Tools](#)" to assist researchers and universities to promote and advertise their publications, thereby increasing their research visibility and impact.

**Keywords:** H-index, Improve citations, Research tools, Research visibility, Research impact, University rankings

**RESEARCH  
VISIBILITY AND ITS  
IMPACT ON  
UNIVERSITY  
RANKING**

**By Dr. Nader Ale Ebrahim**  
Research Visibility and Impact consultant

**OBJECTIVES**

- I. To increase the published paper's visibility, accessibility
- II. To improve your research impact and ranking
- III. To rise citations of your publications
- IV. To make your research and teaching activities known
- V. To trace the citation

## The definition of Research Visibility and Impact

- **Research Visibility** refers to how well other scientists and/or the general public know your research and you as a researcher.
- **Research Impact** generally refers to the effect research has in areas outside the academia - economy, society, culture, Environment, etc.
- The easiest definition of “research impact” is “**Making the world better**”.
- Science should contribute to making the world better.

### Article Description

Background: Malnutrition in older persons is a public health concern. This study aimed to estimate the prevalence of malnutrition and its associated factors among community-dwelling older persons in Sri Lanka. Methods: A cross-sectional study was conducted in the Kandy district, Sri Lanka. The nutritional status of older persons was assessed using the Mini Nutritional Assessment -Short Form (MNA-SF). A standardised questionnaire was used to record factors associated with malnutrition: characteristics, financial characteristi

### Review Description

Malnutrition among older people is one of the serious public health problem worldwide. Nutritional status and levels of nutrients of older patients with COVID-19 effect on COVID-19 outcomes. The purpose of this systematic review was to identify the prevalence of malnutrition and levels of nutrients associated with outcomes of the older patients with COVID-19. A literature search was performed using PubMed, Science direct and Google scholar database using specific keywords related to the topic. All selected articles published on COVID-19 during the period of 2020-2021 were included in the review.

### Paper Description

Nowadays, the world's scientific community has been publishing an enormous number of papers in different scientific fields. In such environment, it is essential to know which databases are equally efficient and objective for literature searches. It seems that two most extensive databases are Web of Science and Scopus. Besides searching the literature, these two databases used to rank journals in terms of their productivity and the total citations received to indicate the journals impact, prestige or influence. This article attempts to provide a comprehensive

### 3- Increasing Visibility and Enhancing Impact of Research

Source: Bong, Yiibonn and Ale Ebrahim, Nader, Increasing Visibility and Enhancing Impact of Research (April 24, 2017). Asia Research News 2017. Available at SSRN: <https://ssrn.com/abstract=2959952>

## Solutions 1/3

- Use a unique name consistently throughout academic careers;
- Use a standardized institutional affiliation and address;
- Repeat key phrases in the abstract while writing naturally;
- Assign keyword terms to the manuscript;
- Use more references;
- Write a longer paper;
- Write a review paper;
- **Present a working paper;**

Read more: Ale Ebrahim, N., Salehi, H., Embi, M. A., Habibi Tanha, F., Gholizadeh, H., Motahar, S. M., & Ordi, A. (2013). [Effective Strategies for Increasing Citation Frequency](#). International Education Studies, 6(11), 93-99. doi: 10.5539/ies.v6n11p93

## Solutions 2/3

- Publish your article in journals everyone in your discipline reads
- Open Access (OA) has a positive impact on the growth of citations;
- Publish your work in a journal with the highest number of indexing
- Publish with international authors;
- Publish papers with a Nobel laureate;
- Self-archive articles
- Join academic social networking sites
- Keep your professional web pages and published lists up to date

Read more: Ale Ebrahim, N., Salehi, H., Embi, M. A., Habibi Tanha, F., Gholizadeh, H., Motahar, S. M., & Ordi, A. (2013). [Effective Strategies for Increasing Citation Frequency](#). International Education Studies, 6(11), 93-99. doi: 10.5539/ies.v6n11p93

## Solutions 3/3

- **Make your research easy to find, especially for online searchers**
- **Deposit paper in Open Access repository**
- **Contribute to Wikipedia**
- **link your latest published article to your email signature**
- **Create a podcast describing the research project and submit the podcast to YouTube or Vimeo**
- **Make an online CV.**
- **Citation tracking**

The screenshot shows the Zenodo interface for a document titled "A Milestone in Nader Ale Ebrahim's Academic Career". The document is dated January 6, 2023, and is marked as a "Working paper" and "Open Access". The author is listed as "Ale Ebrahim, Nader". The main text of the document is a personal statement from the author, celebrating 1,527 citations and expressing gratitude to co-authors, researchers, and the academic community. Below the main text, there is a yellow box containing a celebratory message. At the bottom, a preview of the document is shown, indicating it is page 1 of 108.

## A Milestone in Nader Ale Ebrahim's Academic Career

Ale Ebrahim, Nader

I have received 1,527 citations from 1,430 documents to 48 publications in the SCOPUS database up to the end of the year 2022 (The list extracted from SCOPUS on January 5th, 2023). I know it is not a big number compared to others in the field, but it is a small milestone in my academic career. I am grateful because I could have never dreamed of being where I am today. Thanks to all my co-authors who have published with me over the years. It was great writing articles with you as an attempt to disseminate knowledge. Thank you to all respective researchers, scientists, and individuals for recognizing our research team's work. Once more, I would like to say huge thanks to all my fantastic co-authors and all of you who read and cited our papers. Thank you very much for your recognition, encouragement, and support. Your citations will provide more evidence and inspire more researchers in the field to continue conducting more research. The citation number can be considered as one of the indicators for the impacts of our studies on the academic community and I am happy to see the impacts. It has been a challenging, but rewarding, journey with its ups & its downs, which I have loved overall. Once again, I am thankful to all of those who have supported me on my academic journey. It is indeed a special milestone that I will never forget. I hope the new year brings more exciting research and more collaboration between researchers in the field.

Celebrating 1,527 Citations: Gratitude and Recognition. I hope the new year brings more exciting research and more collaboration between researchers in the field.

# Hundreds of extreme self-citing scientists revealed in new database

Some highly cited academics seem to be heavy self-promoters – but researchers warn against policing self-citation.
