figshare

release notes

from 27.04.2023

Christopher Blumzon
product director, fig**share**

A smaller release today consisting mainly of tweaks, changes and bug fixes.

- Administration - Impersonate improvements from public page
  - Should allow for direct impersonation to the edit item page from the public page area when logged in as an administrator
- Explain full text search is for .pdf explicitly on the search page label
- Batch management update - Add ignore_imperfect_match_author flag to avoid user clashes
- Keep edit item sidebar sticky when scrolling
- Send approval/rejection email to item authors based on institution_config option
- Refactor width for overall layout (edit item)
- Integrate text editor for item title (edit item)
- Update the grants set with the latest data from Dimensions
- Add a loader for the facets area (new search page)
- Various text improvements and updates
- *(bug) Website, Edit item: Validation errors for title are not displayed*
- *(bug) Github integration: new release in not imported to a public item if autosync is on*
- *(bug) Website, Edit item, Safari browser: Text editor buttons are not displayed*
- *(bug) Website, Edit item: No error message is displayed when trying to publish/submit for review with empty title*
- *(bug) Edit item page, Files management: The user can select "set as metadata record" option when the item has files*
- *(bug) Search, Item listing: Authors are not listed in the correct order*
- *(bug) Website, New search: search selector for references is changed from :references: to :reference:*
- *(bug) Website, Collection public page: More option button is displayed over owner details text*
- *(bug) Edit item: missing warning before publishing when review is enabled*
- *(bug) Edit item: custom field large dropdown search fails for fields defined at institution level*
- *(bug) Sherpa-Romeo new item overlay not showing all fields*
- *(bug) Grant title facet is not disabled when values for other facets are selected*
- *(bug) Toggling back to "metadata only" leaves page in inconsistent state*

Any questions, give me a shout
