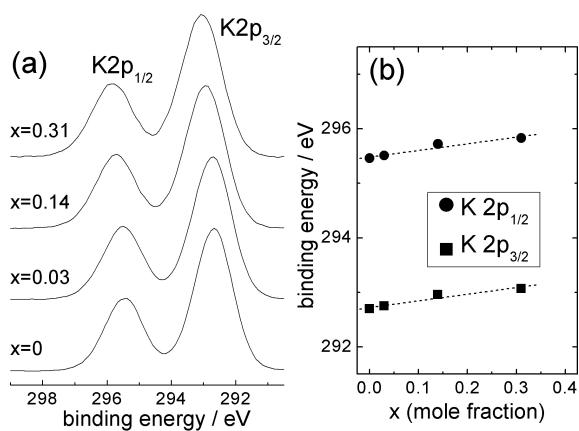

Figure S1: (a) K-2p core-level photoelectron spectra of selected glass compositions in the K-Al metaphosphate system as a function of the Al(PO₃)₃ molar fraction x. (b) Average binding energies as a function of x. Lines are guides to the eye.

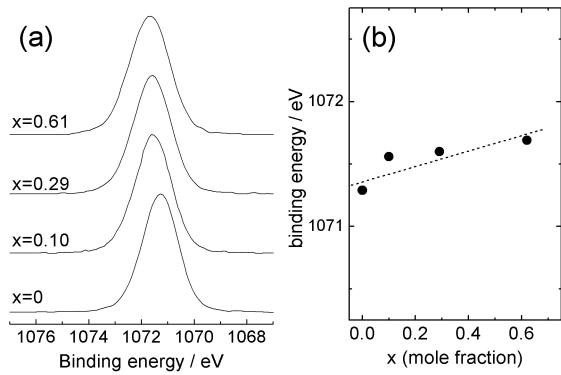

Figure S-2: (a) Na-1s core-level photoelectron spectra of selected glass compositions in the Na-Al metaphosphate system as a function of the Al₂O₃ molar fraction x. (b) Average binding energies as a function of x. The line is a guide to the eye.

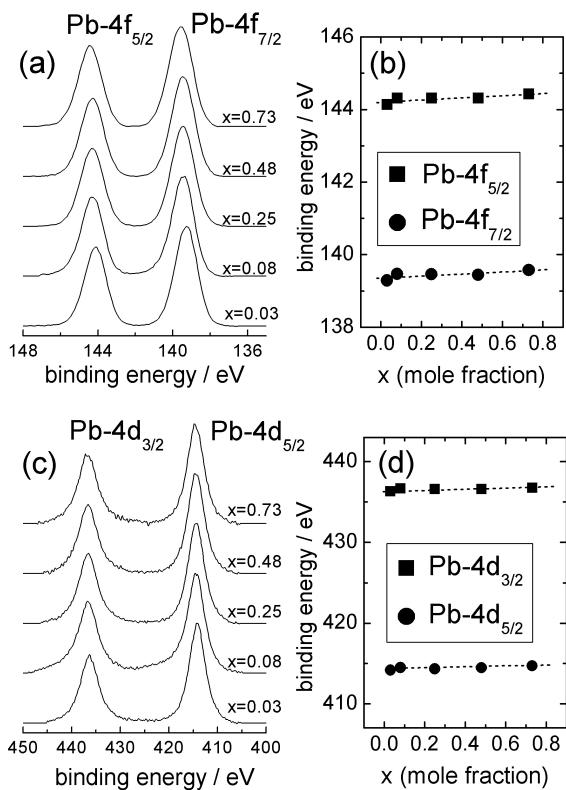

Figure S-3: Pb-4f (a) and Pb4d (c) core-level photoelectron spectra of selected glass compositions in the Pb-Al metaphosphate system as a function of the Al(PO₃)₃ molar fraction x. Average binding energies as a function of x for Pb-4f (b) and Pb4d (d). Lines are guides to the eye.
