<sup>f</sup> Singlet of vinyl proton (of one proton unit) is observed at modified Tyr C<sup>β</sup> atom. This signal shows the strong NOE connectivity with the aromatic δ-protons of the phenyl ring.

<sup>g</sup> Not determined because the <sup>1</sup>H-NMR spectra for peptides asFP595-Ia, asFP595-Ib, and asFP595-II were not studied in H<sub>2</sub>O (10% D<sub>2</sub>O).
