

“Protein Nanostructures Formed Via Direct-Write Dip-Pen Nanolithography”

Ki-Bum Lee, Jung-Hyuk Lim, Chad A. Mirkin

Supporting Information:

Figure 1. (A) Zoom-in image of an IgG nanodot array after treatment with an aqueous solution of anti-IgG coated Au nanoparticles. (B) Three dimensional image of (A).

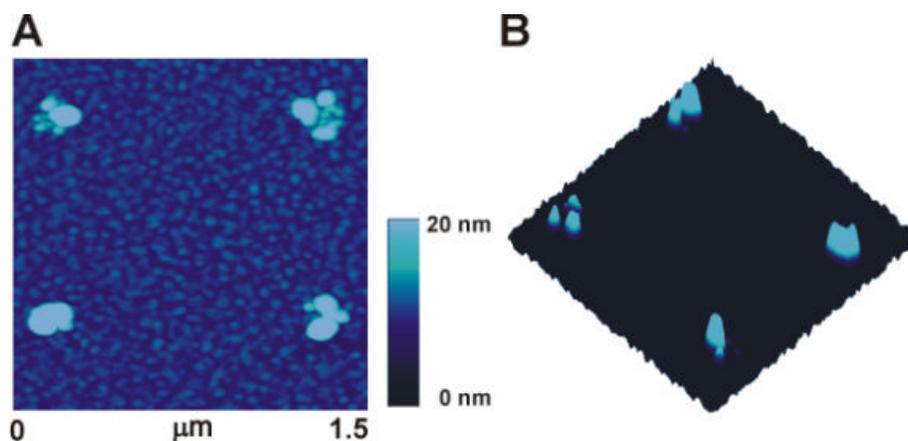

Figure 2. Zoom-in image of two component protein pattern after reaction with anti-IgG. (A) Topography image and (B) phase image
